1. Purpose

This document presents findings referring to the tests done on the "Ascent" website.

The tests were carried out on the main functions of the site, which refer to operations such as:

- The navigation menu and its display
- Using various features
- Reading information about the hostel, etc.

2. Application Overview

The main purpose of the "Ascent" website is to advertise the hostel's events and its learning programs.

It also has information regarding popular hikes in the northern part of Israel.

Ascent is a Guest House, that focuses on the teachings of Kabbalah, it appeals to adventurous people who are interested in learning about their Jewish heritage.

4. Recommendations

1. Fixing the Website's distribution of information is VERY important, this will ensure that the user is not overwhelmed by the content.

2. Consistency is key for a good 'flow' on any Website, adjusting the Graphic Design throughout the pages will achieve that goal.

3. The website's main purpose needs to be clearer, focusing on what will guarantee a rise in participation.

4. Eliminating unnecessary content from the Website will clean up the pages and help create a more welcoming environment.

5. There is a Security issue on many of the Website's pages, this MUST be resolved as it's a threat to the entire website!

5. Conclusion

After completing the various tests on the "Ascent" website, quite a few bugs were found. Most of them have a degree of severity between low and minor. So, despite the relatively large number of bugs, the website still functions reasonably well.

Although the bugs are not show-stoppers, I recommend pulling the site offline, due to the number of intermittent bugs that have a security issue.

This problem MUST be dealt with immediately so that the site can become operational once again.

6. Tree Testing for the 'Ascent' Website

Table Of Contents:

A. Header

B. Hovering Buttons

C. Footer

D. Home Page

E. Abot Page

F. Programs Page

G. Our Hostel Page

H. Get Inspired Page

I. Reserve Now Page

J. Contact Page

K. Donate Page

A. Header:

1. Icon's (Twitter, Facebook, Instagram)

- TESTS:

Functionality Tests

1. **Link Tests:** = **PASS**

- Verify that the Twitter icon links to the correct Twitter page or profile.

- Verify that the Facebook icon links to the correct Facebook page or profile.

- Verify that the Instagram icon links to the correct Instagram page or profile.

2. **'Clickability' Tests:** = **PASS**

- Check if the icons are clickable.

- Verify that clicking each icon opens the correct URL in a new tab or window as intended.

3. **Hover State Tests:** = **PASS**

- Ensure that each icon's hover state (if any) is activated when the mouse pointer is over the icon.

- Verify that the hover state does not activate when the mouse pointer is outside the icon's clickable area.

4. **Accessibility Tests:** = **PASS**

- Ensure each icon has appropriate `alt` text for screen readers.

- Verify that the icons can be selected and activated using keyboard navigation.

5. **Share Functionality Tests (if applicable):** = **PASS**

- If the icons are meant for sharing content, verify that the correct content is pulled up in the share dialog by clicking each icon.

Visual and Content Tests

1. **Icon Visibility Tests:** = **PASS**

   - Verify that the icons are visible against the background.

   - Check for proper alignment of icons with each other.

2. **Responsive Design Tests: = FAIL** (Bug: ASC-1)

   - Test the visibility and alignment of icons on different screen sizes and resolutions.

   - Ensure that the icons scale properly and remain clickable on mobile devices.

3. **Consistency Tests: =PASS**

   - Ensure that the icons are consistent in style and size.

   - Verify that the icons match the brand's official icons for each social media platform.

4. **Color and Theme Tests: =PASS**

   - Verify that the icons' colors match the brand guidelines or website theme.

   - Test for proper contrast between the icons and their background.

Performance and Load Tests

1. **Speed Tests: =PASS**

   - Check that the icons load quickly on various internet speeds.

   - Ensure the icons are optimized for performance (e.g., file size, image format).

2. **Cache Tests: =PASS**

   - Verify that the browser 'caches' the icons for faster load times on repeat visits.

Security Tests

1. **Secure Links Tests: =PASS**

   - Ensure that the URLs for the icons use HTTPS protocol.

   - Verify that the target URLs do not redirect to malicious sites.

2. Logo --> 'Home-Page'

- TESTS:

Visual and Content Tests

1. **Resolution and Clarity Tests: = FAIL** (Bug: ASC-2)

   - Verify that the logo's image is of high resolution and clarity on various devices.

   - Ensure no pixelation or distortion at standard resolutions and zoom levels.

2. **Color Accuracy Tests: =PASS**

   - Check that the logo matches the expected brand colors across browsers and devices.

   - Ensure that the logo's colors are consistent with other branded materials.

3. **Size and Proportion Tests: = FAIL** (Bug: ASC-3)

   - Verify that the logo maintains correct proportions and does not get stretched or squashed on different screen sizes.

- Ensure that the logo size is appropriate for the space it occupies and is visually harmonious with the rest of the website layout.

4. **Placement and Alignment Tests: =PASS**

- Check that the logo is correctly placed on the website according to the design specifications.
- Ensure the logo is aligned properly with other elements on the header or wherever it is placed.

5. **Visibility Tests: =PASS**

- Ensure that the logo is visible against the website's background.
- Test the visibility in different lighting conditions and screen brightness.

Functional Tests

1. **Link Tests: =PASS**

- Verify that clicking on the logo redirects to the homepage or the intended URL.
- Ensure the link is correctly set up with an appropriate `href ` attribute.

2**. Hover State Tests: =PASS**

- If the logo changes on hover, ensure the change is smooth and functions as intended.
- Check for any text or tooltip that appears when hovering, if applicable, and verify its accuracy.

3. **Accessibility Tests: =PASS**

- Ensure the logo has appropriate `alt` text for screen readers.
- Verify that the logo can be accessed through keyboard navigation.

Performance Tests

1. **Load Time Tests: =PASS**

- Verify that the logo loads quickly and does not affect page load time.
- Check the logo's file size to ensure it is optimized for web use.

2. **Cache Tests: =PASS**

- Ensure the logo is 'cached' properly to improve load times on subsequent visits.

Browser Compatibility Tests

1. **Cross-Browser Tests: =PASS**

- Test the logo's appearance and functionality on different browsers (e.g., Chrome, Firefox, Safari, Edge) to ensure it works and looks consistent across them.

2. **Responsive Design Tests: =PASS**

- Ensure the logo adjusts and is responsive on various devices including desktops, tablets, and smartphones.

Security Tests

1. **Secure Resource Tests: =PASS**

- Confirm that the logo image is served over HTTPS to prevent mixed content warnings on secure pages.

3. Main menu:

a. About
b. Programs
c. Our Hostel
d. Get Inspired!

e. Reserve Now
f. Contact
g. Donate
h. Hebrew
i. French

- TESTS:

Functional Tests

1. **Navigation Link Tests: =PASS**

- Verify that each navigation link ('About', 'Programs', 'Our Hostel', 'Get Inspired!', 'Reserve Now', 'Contact', 'Donate') correctly redirects to the associated section or page.

- Test dropdown menus under 'About' and 'Programs' to ensure they expand and collapse properly, and that each item links to the correct sub-section or page.

2. **Language Selection Tests: =PASS**

- Check that the 'Hebrew' and 'French' links correctly change the site's language to Hebrew and French.

- Confirm that all content is properly translated when a language is selected.

3. **Social Media Icon Tests: =PASS**

- Ensure that the social media icons (Twitter, Facebook, Instagram) link to the correct respective pages.

- Confirm that clicking on the icons opens a new tab or window to the social media page.

4**. Reservation Button Test: =PASS**

- Test the 'Reserve Now' button to ensure it leads to the reservation page or form.

5. **Responsive Design Tests: =PASS**

- Confirm that the header navigation is responsive and adjusts correctly on various device screens (desktop, tablet, mobile).

- Ensure that the navigation menu collapses into a hamburger menu or similar on smaller screens and functions correctly.

Visual and Content Tests

1. **Layout and Alignment Tests: =PASS**

- Check that all elements in the header are aligned properly and match the design specifications.

- Verify that the logo is correctly placed and is visually balanced with other header elements.

2. **Color and Style Tests: = FAIL** (Bug: ASC-4)

- Confirm that the colors of the header, text, and buttons match the website's style guide.

- Ensure that hover states for links and buttons have the correct color change or effect.

3. **Typography Tests: =PASS**

- Verify that the header uses the correct typefaces, font sizes, and weights.

Usability Tests

1. **Ease of Navigation Test: =PASS**

- Test the header to ensure users can easily navigate to different parts of the site without confusion or difficulty.

2. **Accessibility Tests: =PASS**

Up

- Check that the header is accessible, with appropriate alt text for images, and navigable by keyboard.

- Ensure that the site header meets WCAG guidelines for accessibility.

Performance Tests

1. **Speed Tests: =PASS**

- Verify that the header loads quickly and does not negatively impact page load time.

Cross-Browser Compatibility Tests

1. **Browser Tests: =PASS**

- Check the header's functionality and appearance across multiple browsers (Chrome, Firefox, Safari, Edge, etc.) to ensure compatibility.

Security Tests

1. **Link Security Tests: =PASS**

- Confirm that all links in the header use HTTPS to ensure data is encrypted.

B. Hovering Buttons:

1. WhatsApp Us

- TESTS:

Functional Tests

1**. 'Clickability' Test: =PASS**

- Verify that the button is clickable.

- Check that clicking the button initiates the expected action, such as opening a WhatsApp chat window or prompting to launch the WhatsApp application.

2. **Hover Test: =PASS**

- Ensure that any hover effects (such as color change, animation, tooltip) are triggered when the cursor is over the button.

- Confirm that the hover effects revert when the cursor is moved away from the button.

3. **Link Test: =PASS**

- Check that the button's hyperlink is correctly formatted with the WhatsApp URL scheme (`https://wa.me/` followed by the phone number).

- Verify that the link includes any necessary tracking parameters if used for analytics.

4. **Focus Test: =PASS**

- Ensure that the button can gain focus when tabbed via keyboard navigation.

- Confirm that any visual changes to indicate focus (for keyboard navigation) are in place and functioning.

Visual Tests

1. **Color and Design Test: =PASS**

- Confirm that the button's color matches the design specifications.

- Check for consistent font style, size, and alignment of the text within the button.

2. **Responsive Design Test: =PASS**

- Ensure that the button is visible and maintains its aspect ratio on different screen sizes.

- Verify that the button's position remains fixed or as intended on different devices.

Accessibility Tests

1. **Contrast Test: =PASS**

- Verify that the text and button background have sufficient contrast to be easily readable.

- Confirm that the button meets WCAG (Web Content Accessibility Guidelines) standards for contrast.

2. **Screen Reader Test: =PASS**

- Check that screen readers can accurately read the button's text and describe its function.

- Ensure that `aria-label` or similar attributes are properly used if the text alone is not descriptive enough.

Performance Tests

1. **Load Time Test: =PASS**

- Verify that the button loads quickly and appears with the initial page load without delay.

- Check that the button's image or style definitions are optimized for performance.

2. **Stress Test: =PASS**

- Test the button's functionality under various conditions, including slow network speeds, to ensure it remains functional.

Security Tests

1. **Secure Protocol Test: =PASS**

- Ensure the WhatsApp link uses HTTPS to maintain security standards.

Usability Tests

1. **User Experience Test: = FAIL** (Bug: ASC-5)

- Check that the button is placed in a location that is intuitive for users and does not obstruct other important content on the page.

- Ensure that the button does not interfere with the page's usability, especially on mobile devices where screen real estate is limited.

- Sign-Up WhatsApp form:

Functional Tests

1. **Input Field Validation Tests:**

  - Verify that the 'Phone' input field accepts numeric and special characters only. **=PASS**

  - Check that the input field does not accept letters. **=PASS**

  - Confirm the field has a validation check for the correct phone number format (including country code if necessary). **= FAIL** (Bug: ASC-6)

2. **Form Submission Tests:**

  - Ensure that the form can be submitted when a valid phone number is entered. **=PASS**

  - Verify that an error message is displayed when trying to submit the form with an invalid phone number. **= FAIL** (Bug: ASC-7)

  - Confirm that an error message appears if the 'Phone' field is left blank and the 'Start chat' button is clicked. **=PASS**

- Test that upon successful form submission, the user is redirected to a WhatsApp chat with the entered phone number, or a WhatsApp web/app is opened. =**PASS**

3. **Button Functionality Tests:**

- Check if the 'Start chat' button is clickable. =**PASS**

- Verify that the button becomes active (not greyed out or disabled) when a valid phone number is entered. = **FAIL** (Bug: ASC-8)

Usability Tests

1. **Layout and Design Tests:** =**PASS**

- Confirm that the input field and button are aligned properly and match the design specifications.

- Ensure that the form is visible and prominent to the user.

2. **Responsive Design Tests:** =**PASS**

- Check the form's appearance and functionality on various screen sizes and devices.

3. **Accessibility Tests:** =**PASS**

- Ensure that the form is accessible, with proper labels for screen readers, and that it can be navigated using the keyboard alone.

- Verify that all elements of the form have sufficient contrast for easy readability.

Non-Functional Tests

1. **Performance Tests:** =**PASS**

- Check the response time of the form submission to ensure it meets performance criteria.

- Test how the form behaves under different network conditions.

2. **Security Tests:** =**PASS**

- Verify that any data entered is sent over a secure connection (HTTPS).

- Check for vulnerabilities to injection attacks by entering malicious code into the phone field.

3. **Error Handling Tests:** = **FAIL** (Bug: ASC-9)

- Test how the form handles unexpected values or behaviors, like extremely long numbers or input that includes scripts or SQL commands.

4. **Cross-Browser Tests:** =**PASS**

- Ensure that the form works correctly across different web browsers.

2. ‘Back-To-top’ Arrow

- TESTS:

Functional Tests

1**. Visibility Test:** =**PASS**

- Verify that the button is not visible when the page is loaded and only appears after scrolling down a certain amount.

2. **Hover Test:** =**PASS**

- Confirm that any hover effects (such as color change, tooltip, etc.) are triggered when the mouse is over the button.

3. **Click Test:** =**PASS**

- Check that clicking the button takes the user back to the top of the page.

- Ensure that the action is smooth and does not lead to any unwanted behavior or page refresh.

Up

4. **Scroll Test: =PASS**

- Verify that the button disappears when the user scrolls back to the top of the page.

5. **Position Test: =PASS**

- Ensure the button maintains a consistent position (typically bottom-right corner) on the page as the user scrolls.

Usability Tests

1. **Design Consistency Test: =PASS**

- Check that the button's design is consistent with the website's theme.

2. **Responsive Test: =PASS**

- Ensure the button is easily clickable on various devices, especially on mobile screens where finger tapping is used instead of a mouse cursor.

3. **Accessibility Test: =PASS**

- Verify that the button is accessible via keyboard navigation.
- Confirm that screen readers can properly announce the button’s purpose.

Performance Tests

1. **Load Impact Test: =PASS**

- Confirm that the presence of the button does not significantly impact the page loading times.

2. **Behavior Under Load Test: =PASS**

- Test the functionality of the button under different network conditions, ensuring it works smoothly on slow networks too.

Browser Compatibility Tests

1. **Cross-Browser Functionality Test: =PASS**

- Verify that the button works as intended across different web browsers (Chrome, Firefox, Safari, Edge, etc.).

2. **Cross-Platform Test: =PASS**

- Ensure the button is functional and displays correctly on different operating systems (Windows, macOS, Linux, iOS, Android).

C. Footer:

- TESTS:

Functional Tests

1. **Breadcrumb Navigation Tests: =PASS**
   - Verify that each part of the breadcrumb trail (Kabbala-Online, Ascent of Safed) is clickable and redirects to the correct page.
2. **Third-Party Badge Tests: =PASS**
   - Check if the TripAdvisor badge is clickable and leads to the correct TripAdvisor page for "Ascent of Safed Hostel."
   - Ensure that the badge opens in a new tab or window to keep the site open in the background.
3. **Map Integration Tests: =PASS**
   - Confirm that clicking 'View larger map' opens the map in a new tab or window at the appropriate location.

Up

Visual and Content Tests

1. **Design Consistency Tests: =PASS**
   - Check that the footer design matches the website's style guide and is consistent across different pages.
   - Confirm that text, icons, and graphics are aligned and have the correct size and color.
2. **Responsive Design Tests: =PASS**
   - Ensure the footer content is responsive and displays correctly on various devices and screen sizes.
   - Test how the footer elements stack or rearrange themselves on smaller screens.

Usability Tests

1. **Legibility Tests: =PASS**
   - Confirm that all text in the footer is in a font size and color that is easy to read.
   - Ensure that any icons or badges used are recognizable and convey their intended message.
2. **Accessibility Tests: =PASS**
   - Check that all footer links are accessible via keyboard navigation.
   - Verify that screen readers can properly read and interpret the content, including the map area and TripAdvisor badge.

Performance Tests

1. **Load Time Tests: =PASS**
   - Verify that the footer loads efficiently and does not impact page loading time.
   - Check if the embedded Google Map is optimized for fast loading.

Security and Compliance Tests

1. **Link Security Tests: =PASS**
   - Confirm that all external links use HTTPS, especially for the TripAdvisor badge and Google Maps.

Cross-Browser Compatibility Tests

1. **Browser Tests: =PASS**
   - Test the footer's functionality and appearance across multiple web browsers to ensure compatibility.

Content Verification Tests

1. **Information Accuracy Tests: =PASS**
   - Confirm that the information presented in the footer (like the address shown on the map) is accurate and up to date.

D.Home Page:

- TESTS:

Functional Tests

1. **Image Carousel Tests: =PASS**

- Ensure that image transitions in the carousel are smooth and function upon user interaction - (click, swipe).

- Confirm that any navigation buttons (like arrows) correctly cycle through the carousel images.

2. **Content Section Tests: =PASS**

- Verify that each 'Read more' link in content sections such as "The Hostel" and "Volunteering" redirects to the appropriate detailed page.

- Test that the 'See All Events' link navigates to a page listing all events.

3. **Upcoming Events Tests: =PASS**

Up

- Check that each event listed under "Upcoming Events" has a 'Read More' link that directs to the event's detailed information.

2. **WhatsApp Group Link Test: =PASS**
   - Confirm that the 'Join Group!' call-to-action for WhatsApp updates directs the user to a WhatsApp group as intended.
3. **Image uploading tests:**
   - Check that all images are loading onto the page correctly. **= FAIL** (Bug: ASC-19) + (Bug: ASC-29)
4. **Link test:**
   - Check that the 'photo gallery' links to the correct page. **= FAIL** (Bug: ASC-30)
   - Check that the 'events calendar' links to the correct page. **=PASS**

Visual and Content Tests

1. **Content Layout Tests: =PASS**
- Ensure that the layout of the content sections is visually appealing and matches the design specifications.

- Confirm that text is legible, and images are clear without pixelation.

Usability Tests

1. **Interactivity Tests: =PASS**
- Test interactive elements like buttons or links for proper feedback (e.g., color change on hover).

Accessibility Tests

1. **Screen Reader and Keyboard Navigation Tests: =PASS**

- Confirm that content is structured in a logical order for screen readers.

- Ensure that interactive elements can be accessed and activated using keyboard-only controls.

Cross-Browser Compatibility Tests

1.**Cross-Browser Display Tests: = FAIL** (Bug: ASC-23)

- Check the display and functionality of content elements across multiple web browsers.

E. About Page:

1. About Ascent Page

- TESTS:

Functional Tests

1. **Content Verification Test: =PASS**

- Ensure that the descriptive text about Ascent accurately reflects the organization's objectives and activities.

2. **Image Display Test: =PASS**

- Verify that all images on the page load correctly and match the content they are intended to illustrate.

3. **Internal Linking Test: =PASS**

- Test all internal links within the page, such as links to other sections like 'Kabbala-Online' and 'Ascent of Safed', to ensure they direct to the correct pages.

Visual and Content Tests

1. **Layout Consistency Test: =PASS**

- Check that the page layout is consistent with the rest of the website, including fonts, headers, and footers.

2. **Responsive Design Test: =PASS**

- Confirm that the page's content and images responsively adjust to different screen sizes and devices.

Usability Tests

1. **Readability Test: =PASS**

  - Verify that the page content is easy to read and accessible, with a logical flow that facilitates user understanding.

Performance Tests

1. **Page Load Test: =PASS**

  - Measure the load time of the 'About Ascent' page to ensure it meets the site's performance standards.

Accessibility Tests

1. **Screen Reader Compatibility Test: =PASS**

  - Check that the page is navigable and readable by screen reader software, ensuring that alt texts for images are present and accurate.

Cross-Browser Compatibility Tests

1. **Cross-Browser Functionality Test: =PASS**

  - Test the 'About Ascent' page across multiple web browsers to ensure consistent functionality and display.

2. Who's Who Page

- TESTS:

Functional Tests

1. **Staff Information Verification Test: =PASS**

  - Ensure that each staff member's information is correctly displayed, including names, titles, and bios.

2. **Contact Information Test: =PASS**

  - Verify that any provided contact information, such as email addresses or phone numbers, is accurate and properly linked to initiate an email or call when clicked.

Visual and Content Tests

1. **Content Layout Test: =PASS**

  - Check that the text is well-organized and that the layout is consistent with the website's design standards.

2. **Typography and Readability Test: =PASS**

  - Verify that the font styles, sizes, and colors are consistent and ensure that the content is easy to read.

Usability Tests

1. **Navigation and Scroll Test: =PASS**

  - Test the page navigation to ensure smooth scrolling and that users can easily find information about each staff member.

Performance Tests

Up

1. **Page Load Test: =PASS**

- Measure the load time of the page and ensure it meets performance benchmarks, especially if there are many images or media.

Accessibility Tests

1. **Screen Reader Compatibility Test: =PASS**

- Check the page with screen reader software to ensure that all text and contact information is accessible.

Cross-Browser Compatibility Tests

1. **Browser Display Test: =PASS**

- Ensure that the page is displayed correctly and functions well across various browsers.

F. Programs Page:

1. Upcoming Events Page

- TESTS:

Functional Tests

1. **Event Listing Tests: =PASS**

- Verify that each event is listed with the correct date, title, and description.

- Check that 'Read More' links for each event lead to the detailed event page with additional information.

2. **Date and Time Verification: =PASS**

- Confirm that the dates and times listed for events are in the correct format and represent the actual schedule.

Usability Tests

1. **Navigation Tests: =PASS**

- Test the page's navigation to ensure users can scroll through events smoothly.

- Check that the 'Read More' buttons are easy to find and click.

Visual and Content Tests

1. **Consistency Test: =PASS**

- Ensure that the page's layout and design are consistent with the rest of the website.

- Ensure that all pictures are displayed correctly. **= FAIL** (Bug: ASC-10)

2. **Image Tests: =PASS**

- Confirm that images associated with each event load correctly and are relevant to the event.

Performance Tests

1. **Load Time Tests: =PASS**

- Check the loading times of the events page to ensure it is within acceptable performance thresholds.

Accessibility Tests

1. **Screen Reader and Keyboard Navigation Tests: =PASS**

- Ensure that the page is navigable with keyboard-only controls and readable by screen reader software.

Cross-Browser Compatibility Tests

1. **Browser Tests: =PASS**

- Verify that the events page is displayed correctly, and functions as expected across various web browsers.

a. Event (Am Israel Chai! Getting Stronger Together)

TESTS:

Functional Tests

1. **Content Accuracy Test: =PASS**
   - Verify event details for accuracy.
2. **Internal Link Tests: =PASS**
   - Ensure all internal links work correctly.
3. **Image Tests: = FAIL** (Bug: ASC-11)
   -Confirm all images load.

- Event Form

Functional Tests

1. **Form Field Validation Test:**
   - Check for accurate data validation rules for the 'Name' field. **=PASS**
   - Check for accurate data validation rules for the 'Message' field. **=PASS**
   - Check for accurate data validation rules for the 'Email' field. **=PASS**
   - Check for accurate data validation rules for the 'Phone' field. **= FAIL** (Bug: ASC-12)
2. **Form Required Fields Test:**
   - Confirm which fields are mandatory for form submission. **=PASS**
3. **Form Submission Feedback Test: =PASS**
   - Verify that the success message is appropriate and appears only after a successful submission.
4. **External Link Functionality Test: = FAIL** (Bug: ASC-13)
   -Test that the 'WhatsApp us' and 'Mail us' buttons link to the correct protocols or addresses.

Usability Tests

1. **Form Field Usability Test: =PASS**
   - Assess the clarity of form fields and ease of data entry.
2. **Form Error Message Clarity Test: =PASS**
   -Ensure that error messages are helpful and indicate the action needed.

Visual and Content Tests

1. **Form Design Consistency Test: =PASS**
   - Confirm the form's visual design is consistent with the site's overall aesthetic.
2. **Form Instruction Clarity Test: =PASS**
   -Check that any instructions or descriptions are clearly written and visually distinct.

Performance Tests

1. **Form Load Performance Test: =PASS**
   - Measure the loading time of the form itself and its components.
2. **Form Submission Performance Test: =PASS**

   -Time the form submission process and ensure it is within acceptable parameters.

Accessibility Tests

1. **Form Elements Accessibility Test: =PASS**

   - Verify that all form elements are accessible with screen readers and comply with WCAG guidelines.
2. **Keyboard Navigation Test: =PASS**

   - Ensure the form can be navigated and filled using keyboard-only commands.

Usability Tests

1. **Content Readability Test: =PASS**
   -Ensure text readability and clarity.
2. **Form Usability Test: =PASS**

   - Assess form ease of use and instructions.

-Visual and Content Tests

1. **Layout Consistency Test: =PASS**

   -Confirm consistent use of design elements.
2. **Form Style Consistency Test: =PASS**

   -Ensure the form's style matches the site design.

Performance Tests

1. **Page Load Performance Test: =PASS**
   -Measure the page's loading speed.
2. **Form Response Time Test: =PASS**

   - Test form responsiveness and loading time.

Accessibility Tests

1. **Screen Reader Test: =PASS**
   -Check the page's compatibility with screen readers.
2. **Form Accessibility Test: =PASS**

   -Verify the form's accessibility features.

2. Daily Activities Page

- TESTS:

Functional Tests

1. **Content Accuracy Test: =PASS**

   - Verify that the descriptions of daily programs accurately reflect the activities offered.
2. **Internal Link Tests: =PASS**

   - Ensure that any internal links within the content, such as those to volunteering or classes, correctly redirect to their respective pages.
3. **Image Tests: =PASS**

   - Confirm that images on the page are loading properly and are relevant to the accompanying text.

Usability Tests

1. **Content Readability Test: =PASS**

- Check that the text is easily readable, with clear headings for different sections like 'Daily programs.'

Visual and Content Tests

1. **Layout Consistency Test: =PASS**

- Ensure that the page's layout follows the site's design template with consistent use of fonts, colors, and styling.

Performance Tests

1. **Page Load Performance Test: =PASS**

- Measure the loading speed of the page to ensure it is within the acceptable range, especially if images or other media are present.

Accessibility Tests

1. **Screen Reader Test: =PASS**

- Test the page with screen reader technology to confirm that all content is accessible and properly tagged.

Cross-Browser Compatibility Tests

1. **Cross-Browser Display Test: =PASS**

- Verify that the page is displayed correctly, and functions as intended across various web browsers.

3. Volunteering Page

- TESTS:

Functional Tests

- Volunteering form

1. **Form Functionality Test:**

- Ensure that the volunteering application form accepts inputs, validates them, and submits correctly for the fields:

- volunteering dates **= FAIL** (Bug: ASC-14)
- first\last name **= FAIL** (Bug: ASC-15)
- email **=PASS**
- date of birth **= FAIL** (Bug: ASC-16)

Validation of correct location for: = FAIL (Bug: ASC-17)

- Area code (phone)
- address
- Apt, suite, etc.
- country
- City
- State
- zip code

Up

- occupation =**PASS**
- special talents =**PASS**
- medical condition =**PASS**
- observance =**PASS**
- emergency contact =**PASS**
- relationship =**PASS**

2. **Link Test:** =**PASS**

- Test the 'Click here to see pictures' link to ensure it redirects to the appropriate Facebook page or album.

Visual and Content Tests

1. **Content Accuracy Test:** =**PASS**

- Verify that the descriptions of volunteering opportunities are accurate and up to date.

Usability Tests

1. **Navigation Test:** =**PASS**

- Confirm that users can easily navigate the page and find relevant information.

Performance Tests

1. **Load Time Test:** =**PASS**

- Ensure the page, including the form and any linked images, loads within an acceptable time frame.

Accessibility Tests

1. **Screen Reader Compatibility Test:** =**PASS**

- Check the page with screen reader technology to ensure all content, including form fields, is accessible.

Cross-Browser Compatibility Tests

1. **Browser Functionality Test:** =**PASS**

- Test the page across multiple browsers for consistent performance and display.

G. Our Hostel Page:

1. The Hostel Page

- TESTS:

Functional Tests

1. **Image Link Test:** =**PASS**

- Confirm that the 'CLICK TO SEE MORE PICS' links for both Ascent Hostel and Ascent Hotel lead to the correct Facebook albums.

2. **Booking Button Test:** =**PASS**

- Ensure that the 'Book Now' button functions correctly and leads to the reservation page or form.

Visual and Content Tests

1. **Content Accuracy Test:** =**PASS**

- Verify that all descriptions of the accommodation, including room types and meals, are accurate and up to date.

2. **Image Display Test: =PASS**

- Check that all images on the page load correctly and accurately represent the hostel facilities.

Usability Tests

1. **Navigation and Scroll Test: =PASS**

- Test smooth scrolling and easy navigation through different sections of the page.

Performance Tests

1. **Page Load Test: =PASS**

- Measure the page's loading time, ensuring it's within acceptable performance standards.

Accessibility Tests

1. **Screen Reader Compatibility Test: =PASS**

- Confirm that the page content is accessible with screen reader technology.

Cross-Browser Compatibility Tests

1. **Browser Display and Functionality Test: =PASS**

- Ensure the page displays and functions correctly across different web browsers.

2. Testimonials Page

- TESTS:

Functional Tests

1. **Testimonial Display Test: =PASS**

- Verify that each testimonial is displayed correctly with the author's name and location.

- Check for any formatting issues in the text of the testimonials.

2. **Page Navigation Test: =PASS**

- Confirm that navigation through the testimonials is smooth and user-friendly.

Visual and Content Tests

1. **Consistency Test: =PASS**

- Ensure that the page's layout is consistent with the site's overall design, including font style and size.

Usability Tests

1. **Readability Test: =PASS**

- Confirm that the testimonials are easy to read and understand.

Performance Tests

1. **Load Time Test: =PASS**

- Ensure that the page loads quickly and efficiently.

Accessibility Tests

1. **Screen Reader Compatibility Test: =PASS**

- Check that the page is accessible to screen readers and that all content can be read aloud correctly.

Cross-Browser Compatibility Tests

1. **Cross-Browser Display Test: =PASS**

- Verify that the page displays correctly across different browsers.

Up

H. Get Inspired! Page:

1. Kabbalistic and Chassidic stories Page

- Tests:

Functional Tests

1. **Link Test:**

- Verify that all the links on the page function correctly and lead to **secure** locations:

1. 'ASCENT-in-Tzfat' = **FAIL** (Bug: ASC-18)
2. 'Publishers' = **FAIL** (Bug: ASC-20)
3. 'Kabbala-Online' =**PASS**
4. 'Sign-up-Here' = **FAIL** (Bug: ASC-21)

2. **Archive Access Test: =PASS**

- Test the archived story links to ensure they redirect to the correct archived stories for each year.

3. **Mailing List Signup Test: =PASS**

- Check the functionality of the mailing list signup link, ensuring it leads to a working signup form.

4. **WhatsApp Group Joining Test: =PASS**

- Confirm that the link for joining the WhatsApp group is functional and redirects to the correct WhatsApp invitation.

Visual and Content Tests

1. **Consistency Test: =PASS**

- Ensure that the page's layout and design are consistent with the website's overall theme.

Usability Tests

1. **Navigation and Readability Test: =PASS**

- Confirm that users can easily navigate through the stories and archives and that the text is legible.

Performance Tests

1. **Page Load Test: =PASS**

- Check the page's loading time to ensure it is within acceptable performance standards.

2. **font load test: = FAIL** (Bug: ASC-22)

- Confirm all fonts load correctly onto the page.

Accessibility Tests

1. **Screen Reader Compatibility Test: =PASS**

- Test the page with screen reader technology to ensure all content is accessible.

Cross-Browser Compatibility Tests

1. **Browser Functionality Test: =PASS**

- Ensure the page displays and functions correctly across different web browsers.

a. Subscriptions Page:

- TESTS:

Functional Tests

1. **Subscription Link Tests: =PASS**

- Verify that each 'Yes' link correctly initiates an email to subscribe to the respective newsletter or mailing list.

- Confirm that the 'unsubscribe' link leads to the correct page or email setup for unsubscribing.

2. **Content Accuracy Test: =PASS**

- Ensure all descriptions of the subscriptions are accurate and correspond to the linked subscription services.

Usability Tests

1. **Navigation Test: =PASS**

- Test the ease of navigating the page and accessing subscription options.

Visual and Content Tests

1. **Layout Consistency Test: =PASS**

- Check that the page's layout is consistent with the website design.

Performance Tests

1. **Load Time Test: =PASS**

- Confirm the page loads efficiently without significant delays.

Accessibility Tests

1. **Screen Reader Compatibility Test: =PASS**

- Ensure the page is accessible with screen reader technology, particularly the subscription links and descriptions.

Cross-Browser Compatibility Tests

1. **Browser Functionality Test: =PASS**

- Verify that the page displays and functions correctly across various web browsers.

b. Famous Sages and Kabbalists Page:

- TESTS:

Functional Tests

1. **Biographical Link Test: =PASS**

- Verify that the 'Read More' links for each Kabbalist lead to detailed biographical information or related content.

2. **Content Accuracy Test: =PASS**

- Ensure the information about each Kabbalist is accurate and properly presented.

Usability Tests

1. **Navigation Test: =PASS**

- Check that users can easily scroll and read about each Kabbalist without issues.

Visual and Content Tests

1. **Layout and Design Test: = FAIL** (Bug: ASC-24)

- Confirm that the page's layout is consistent with the rest of the site and that the text is legible.

Performance Tests

1. **Page Load Test: =PASS**

- Measure the loading time to ensure it’s within acceptable limits.

Accessibility Tests

1. **Screen Reader Compatibility Test: =PASS**

- Ensure the page is accessible to screen readers and all content can be read aloud correctly.

Cross-Browser Compatibility Tests

1. **Cross-Browser Functionality Test: =PASS**

- Verify that the page displays and functions correctly across different web browsers.

2. About Tzfat Page

- TESTS

Functional Tests

1. **External Link Test: =PASS**

- Verify that the link to the Tzfat info website (www.safed.co.il) is working correctly.

2. **Image load tests:**

- Verify that all the images load correctly and are displayed on the page. **= FAIL** (Bug: ASC-25)

Visual and Content Tests

1. **Content Accuracy Test: =PASS**

- Ensure the information about Tzfat is accurate and properly formatted.

Usability Tests

1. **Readability Test: =PASS**

- Confirm that the page's text is easy to read and understand.

Performance Tests

1. **Load Time Test: =PASS**

- Check the page's loading speed to ensure it's within acceptable limits.

Accessibility Tests

1. **Screen Reader Compatibility Test: =PASS**

- Verify that the page is accessible with screen reader technology.

Cross-Browser Compatibility Tests

1. **Browser Display Test: =PASS**

- Ensure the page displays correctly across different web browsers.

a. Hikes\Nature Reserves Page:

- TESTS:

Functional Tests

1. **Link Functionality Test:**

- Verify that the links to places like Meron, Rabbi Shimon bar Yochai, and Amuka are functional and direct to the correct pages or external sites. **=PASS**

- Verify that the link to ‘Kabbala Online’ is functional and directs to the correct page. **= FAIL**

(Bug: ASC-26)

2. **Information Accuracy Test: =PASS**

- Confirm the accuracy of the descriptions for the various hiking and nature activities offered.

Usability Tests

1. **Navigation and Readability Test: =PASS**

- Check the ease of navigation and readability of the text, ensuring users can easily find and understand the information about hiking and nature reserves.

Visual and Content Tests

1. **Consistency Test: =PASS**

- Ensure that the page's layout and design are consistent with the rest of the website.

Performance Tests

1. **Load Time Test: =PASS**

- Verify that the page loads within an acceptable time frame, especially if it contains images or external links.

Accessibility Tests

1. **Screen Reader Compatibility Test: =PASS**

- Test the page with screen reader technology to ensure all content is accessible.

Cross-Browser Compatibility Tests

1. **Cross-Browser Functionality Test: =PASS**

- Ensure the page displays and functions correctly across different web browsers.

b. Northern Israel Page:

- TESTS:

Functional Tests

1. **Link Functionality Test: =PASS**

- Verify that the links for locations like Amuka, Meron, Peaks of Arbel, and others lead to the correct informational pages or external resources.

Visual and Content Tests

1. **Content Accuracy Test: =PASS**

- Ensure the descriptions and information about each location are accurate and up to date.

Usability Tests

1. **Navigation Test: =PASS**

- Check that the page is easily navigable and user-friendly, with a clear layout of the different regions and associated locations.

Performance Tests

1. **Load Time Test: =PASS**

- Measure the page's loading time to ensure it is within acceptable performance standards.

Accessibility Tests

1. **Screen Reader Compatibility Test: =PASS**

- Ensure that the page is accessible for screen readers, with all links and descriptions properly tagged.

Up

Cross-Browser Compatibility Tests

1. **Browser Display Test: =PASS**

- Verify that the page displays correctly across various web browsers.

c. Holy Sites Page:

- TESTS:

Functional Tests

1. **Link Functionality Test: =PASS**

- Check that 'Read More' links for each holy site lead to detailed information pages.

2. **Content Accuracy Test: =PASS**

- Ensure the descriptions for each holy site are accurate and up to date.

Usability Tests

1. **Navigation and Readability Test: =PASS**

- Confirm easy navigation and readability of text.

Visual and Content Tests

1. **Layout Consistency Test: =PASS**

- Verify consistency with the website's overall design.

Performance Tests

1. **Page Load Test: =PASS**

- Measure loading time for efficiency.

Accessibility Tests

1. **Screen Reader Compatibility Test: =PASS**

- Check accessibility with screen readers.

Cross-Browser Compatibility Tests

1. **Browser Functionality Test: =PASS**

- Ensure proper display and functionality across different web browsers.

I. Reserve Now Page:

- TESTS:

Functional Tests

- Reservation Form

Functional Tests

1. **Form Field Validation Test:**

- Check for accurate data validation on the form's fields. **= FAIL**

(Bug: ASC-27)

2. **Form Required Fields Test:**

- Confirm which fields are mandatory for form submission. **=PASS**

3. **Form Submission Feedback Test:**

- Verify that the success message is appropriate and appears only after a successful submission. =**PASS**

4. **External Link Functionality Test:**

-Test that the 'WhatsApp us' and 'Mail us' buttons link to the correct protocols or addresses. =**PASS**

Usability Tests

2. **Form Field Usability Test:**
   - Assess the clarity of form fields and ease of data entry. =**PASS**

Visual and Content Tests

2. **Form Design Consistency Test:**
   - Confirm the form's visual design is consistent with the site's overall aesthetic. =**PASS**

2. **Form Instruction Clarity Test:**

-Check that any instructions or descriptions are clearly written and visually distinct. =**PASS**

Performance Tests

2. **Form Load Performance Test:**
   - Measure the loading time of the form itself and its components. =**PASS**

2. **Form Submission Performance Test:**

-Time the form submission process and ensure it is within acceptable parameters. =**PASS**

Accessibility Tests

2. **Form Elements Accessibility Test:**

- Verify that all form elements are accessible with screen readers and comply with WCAG guidelines. =**PASS**

Usability Tests

1. **Navigation and Readability Test:**

- Confirm the form is user-friendly and instructions are clear. =**PASS**

Visual and Content Tests

1. **Layout Consistency Test:**

- Check the page's layout is consistent with the website's design. =**PASS**

Performance Tests

1. **Load Time Test:**

- Measure the page's loading time. =**PASS**

Accessibility Tests

1. **Screen Reader Compatibility Test:**

- Ensure the form is accessible with screen readers. =**PASS**

Cross-Browser Compatibility Tests

1. **Browser Functionality Test:**

- Verify proper functionality across different web browsers. =**PASS**

J. Contact Page:

- TESTS:

Up

Functional Tests

- Contact Frome

1. **Form Functionality and Submission Test:**

   - Verify all form fields (name, email, message) accept input. **=PASS**

2. **Field Validation Test:**

   - Check to ensure validation for correct input formats. **= FAIL** (Bug: ASC-28)

Usability Tests

1. **Form Usability and Clarity Test:**

   - Confirm that the form is user-friendly, with clear instructions and labels. **=PASS**

Visual and Content Tests

1. **Design Consistency Test:**

   - Ensure the page's design aligns with the website's overall layout. **=PASS**

Performance Tests

1. **Page Load Time Test:**

   - Measure the page's loading time for efficiency. **=PASS**

Accessibility Tests

1. **Screen Reader Compatibility Test:**

   - Check the form and page content's accessibility with screen readers. **=PASS**

Cross-Browser Compatibility Tests

1. **Browser Functionality Test:**

   - Ensure the page displays and functions correctly across various web browsers. **=PASS**

K. Donate Page:

- TESTS:

Functional Tests

1. **Donation Process Test: =PASS**

   - Verify that the donation process via credit card and PayPal functions correctly.

   - Test the currency selection feature for accuracy.

2. **Link Functionality Test: =PASS**

   - Ensure the link to Ascent’s Executive Summary opens the correct document.

Usability Tests

1. **Form Usability Test: =PASS**

   - Check that the donation form is user-friendly, and instructions are clear.

Visual and Content Tests

1**. Layout Consistency Test: =PASS**

   - Confirm that the page's design is consistent with the site's overall style.

Performance Tests

Up

1. **Page Load Time Test: =PASS**

   - Measure the loading time of the donation page.

Accessibility Tests

1. **Screen Reader Compatibility Test: =PASS**

   - Ensure the page is accessible to screen readers, especially the donation form.

Cross-Browser Compatibility Tests

1. **Browser Functionality Test: =PASS**

   - Verify that the page and donation process work correctly across different web browsers.

Up

7. Bug List

ASC-30: Photo gallery - no pictures displayed.

ASC-29: Home page - three 404 messages in Dev Tools.

ASC-28: Contact form - no validation of fields.

Environment:	**Browser:** Chrome		

Attachments:	Intermittent CORS and Mixed Content Errors on Various Pages.docx
Severity:	Critical

Description

Summary:

Some users are experiencing intermittent CORS policy errors and mixed content warnings on various pages, potentially leading to resources failing to load and a compromised user experience.

Description:

The following issues have been observed on the website when accessed over HTTPS:

1. CORS policy errors are preventing font files from loading, with the browser console displaying messages such as "No 'Access-Control-Allow-Origin' header is present on the requested resource."
2. Mixed content warnings are seen due to some resources being requested over HTTP instead of HTTPS.

Steps to Reproduce:

1. Navigate to http://www.myascent.org/about-2/about-tzfat/holy-sites/the-beer-mayim-chayim/ on the browser.
2. Open the browser's developer tools to the console tab.
3. Refresh the page and observe the errors related to CORS and mixed content.

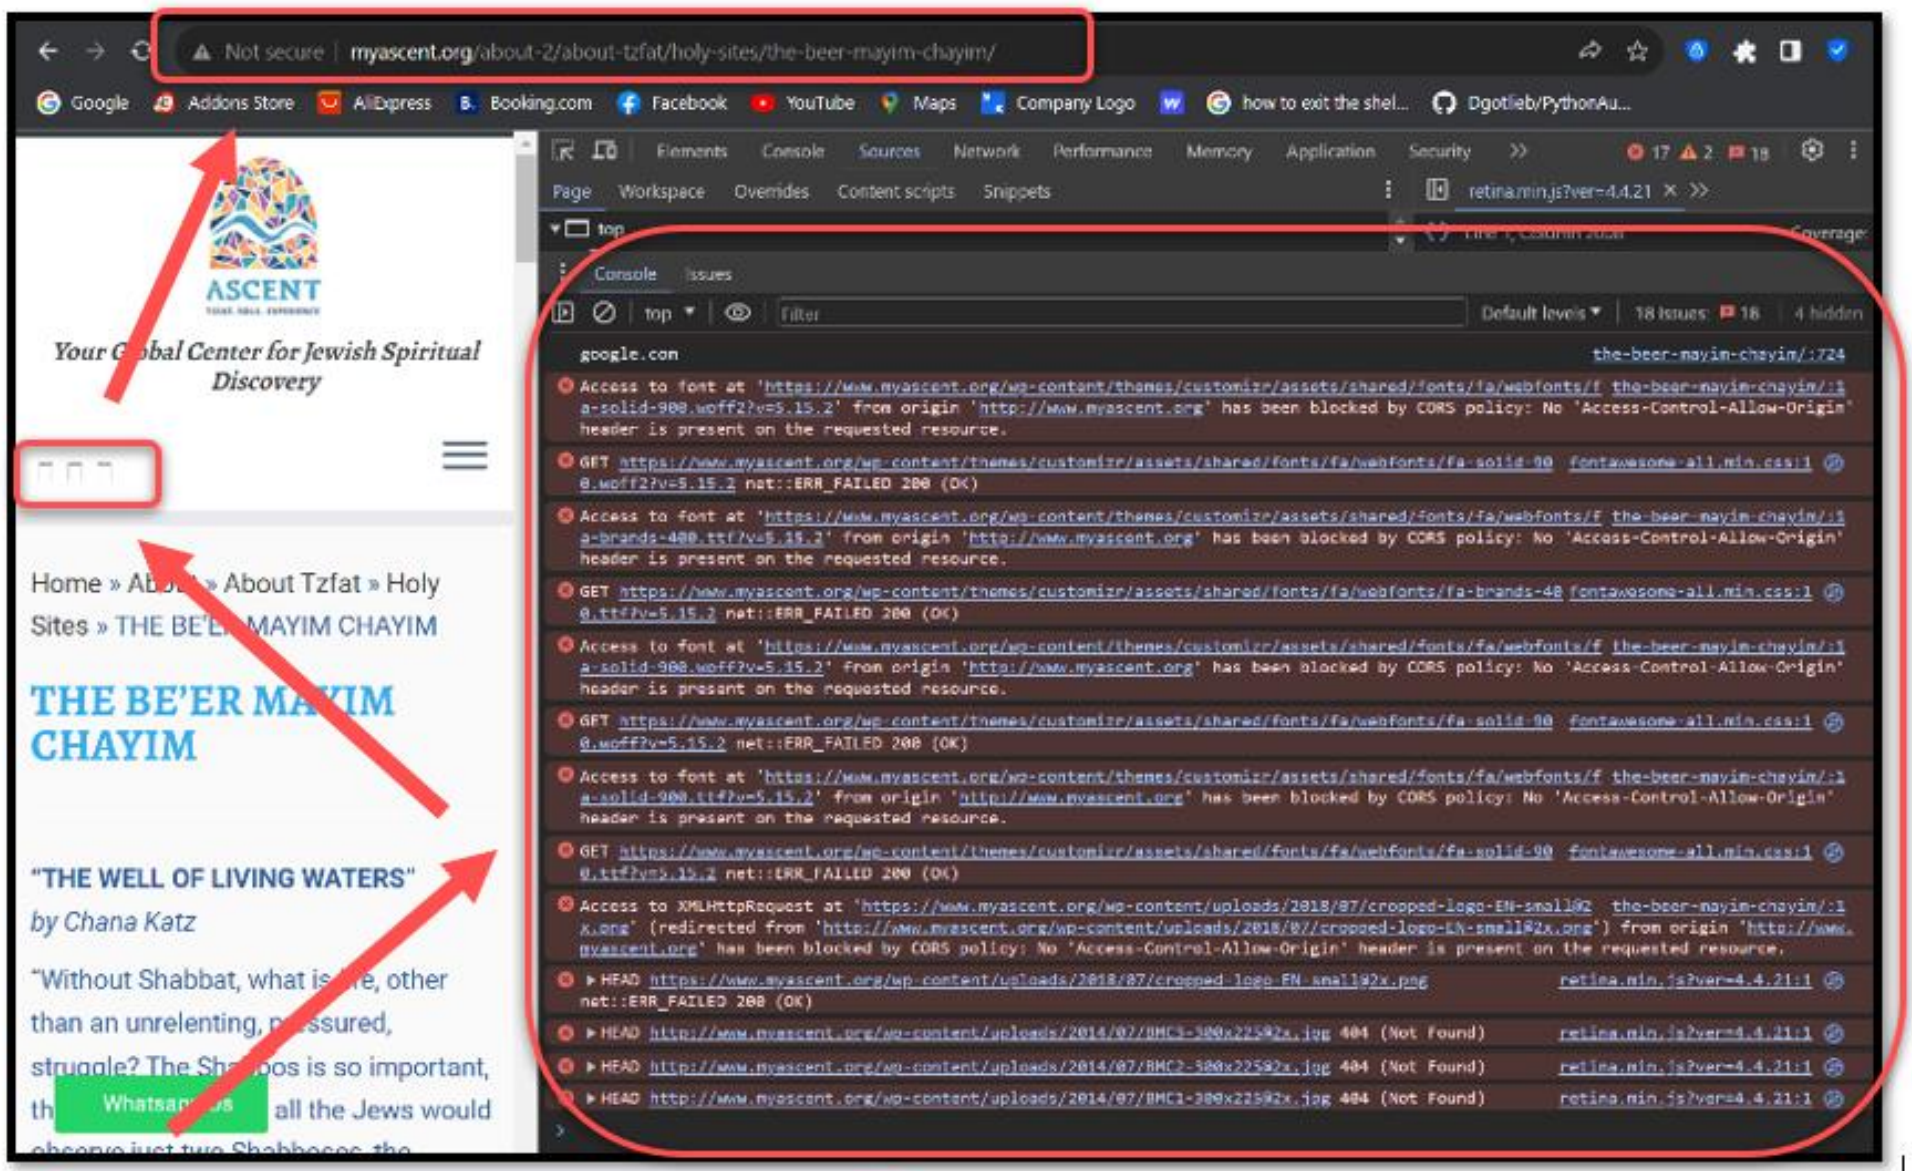
Actual Result:

1. CORS policy errors and mixed content warnings occur, causing some resources to fail to load and a "Not Secure" warning to be displayed in the browser.

Expected Result:

1. All resources on the site should be loaded securely without CORS policy violations or mixed content warnings.

Attachments #23:

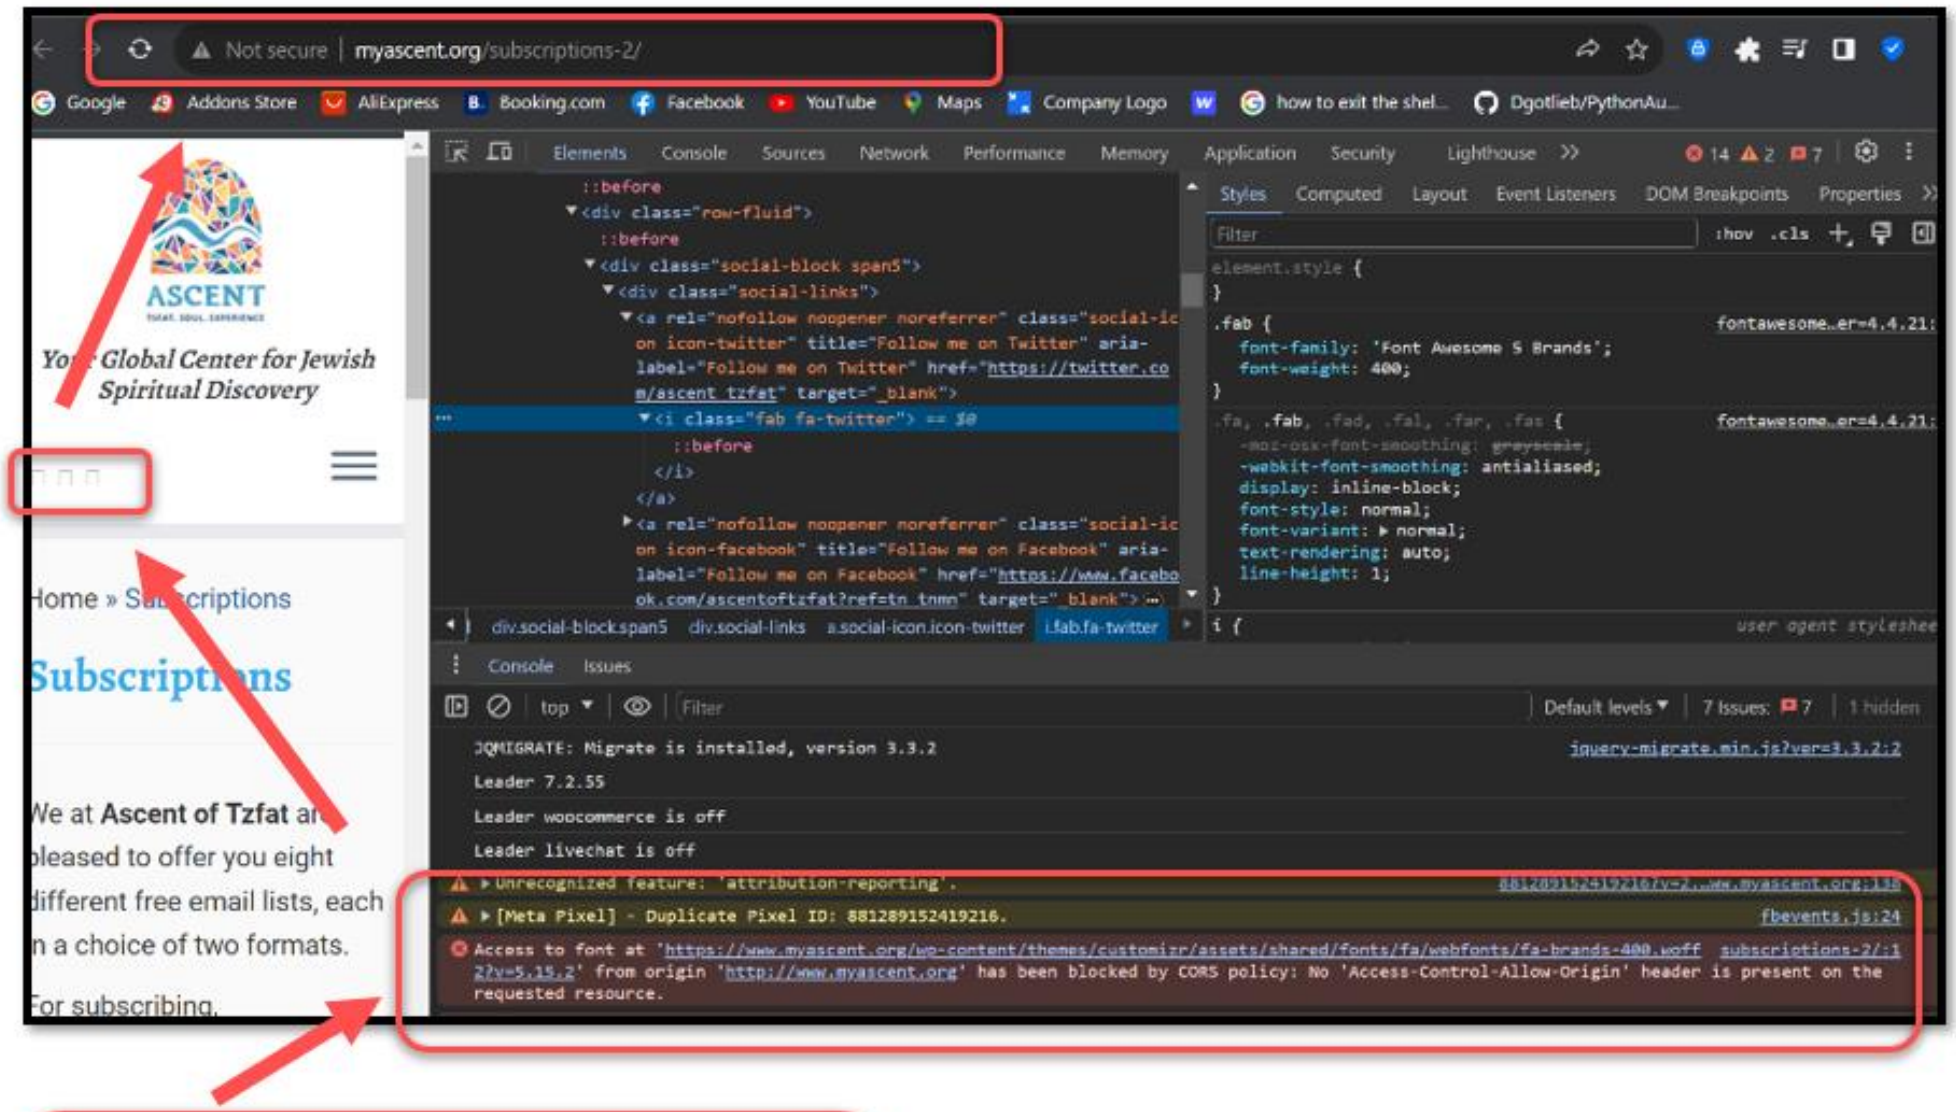


On all these different pages of the site, the same problem occurs:

CORS + Mixed Content

Resulting in a UNSECURE website!

And Icons of Font Awesome don't show up.



On all these different pages of the site, the same problem occurs:

Attachments:	Kabbalistic and Chassidic Stories - 'Sign-up-Here' link - Intermittent CORS Policy Error When Loading Fonts^.docx
Severity:	Major

Description

Steps to Reproduce:

1. Navigate to 'https://www.myascent.org/get-inspired/kabbalistic-and-chassidic-stories/ ' in a web browser.
2. Scroll down to the third paragraph.
3. Click on the 'Sign-up-Here' link.
4. Open the browser's Developer Tools and go to the Console tab.
5. observe the CORS error in the console indicating that the font resource cannot be loaded.

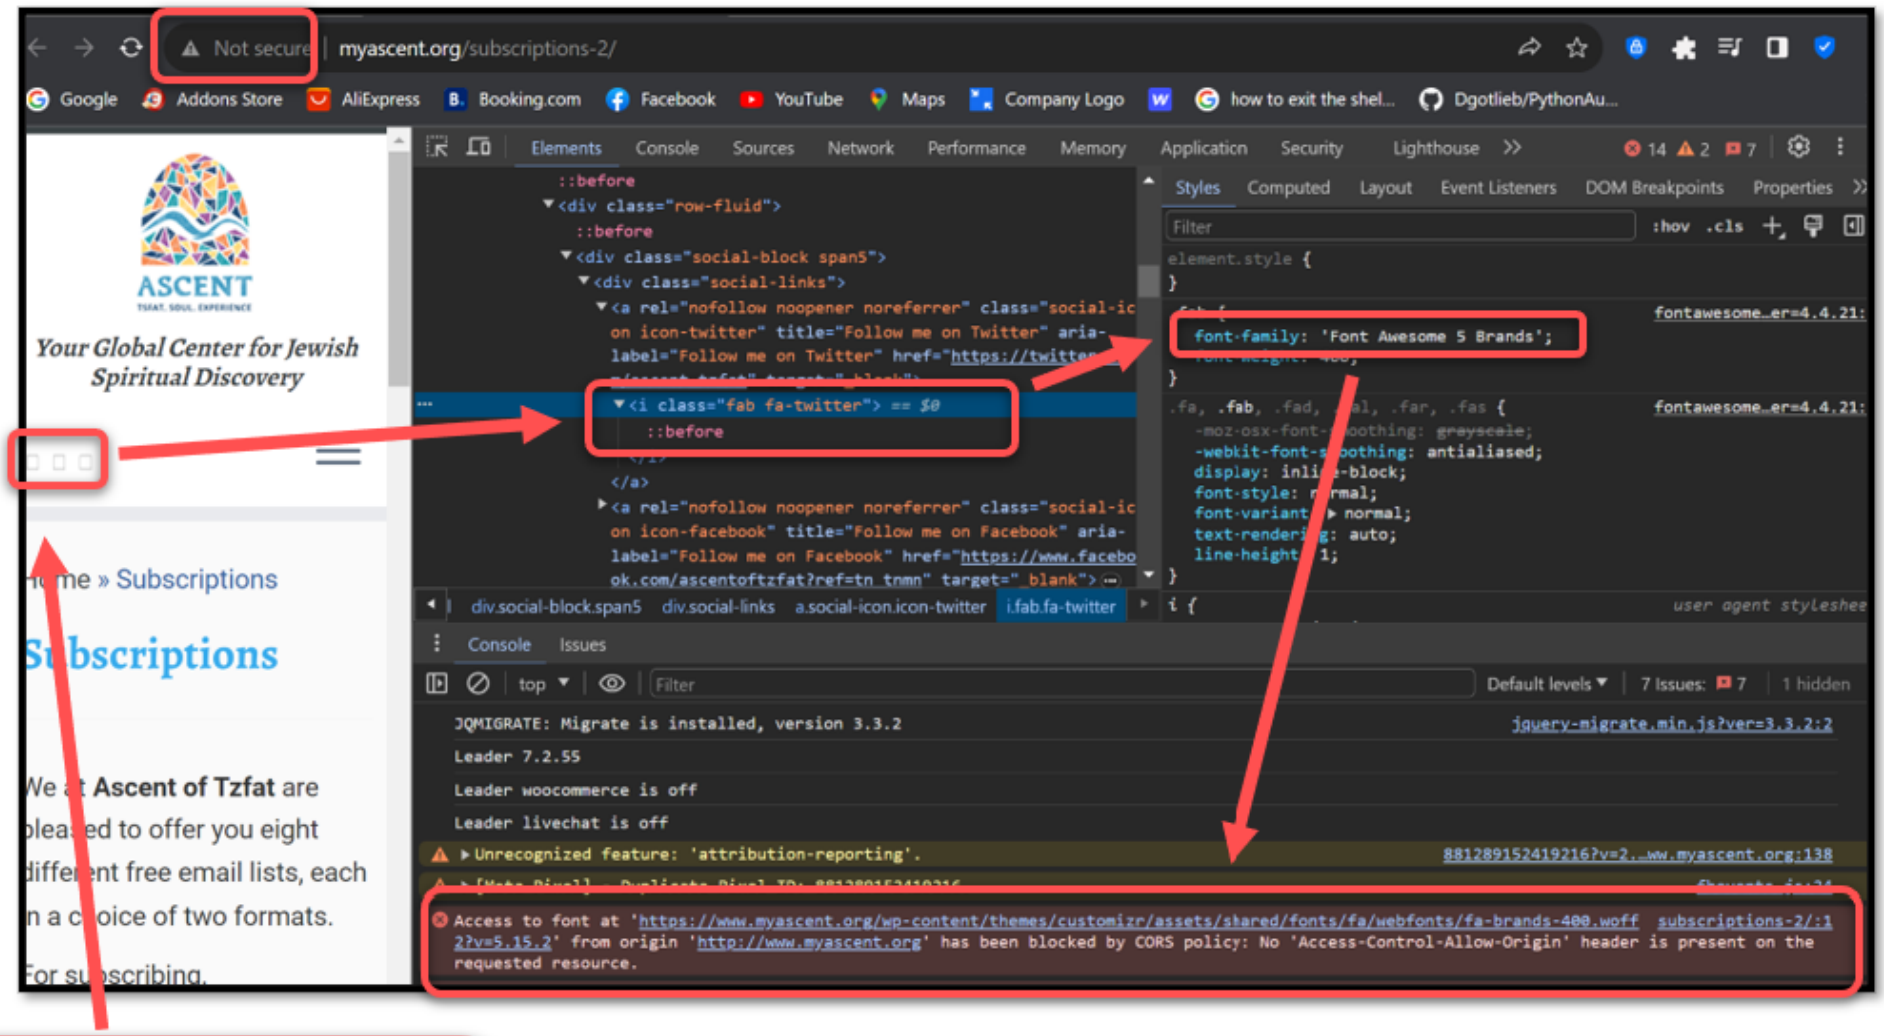
Actual Result:

1. The font fails to load intermittently due to missing CORS headers, resulting in the following error message in the developer console: "No 'Access-Control-Allow-Origin' header is present on the requested resource."

Expected Result:

1. The font should load without any CORS policy errors, regardless of whether the page is accessed via HTTP or HTTPS.

Attachments #22:



Intermittently the page fails to load some of the 'font-awesome' resources due to "Cross-Origin-Resource-Sharing" (CORS)

Time Spent:	Not Specified		
Original estimate:	Not Specified		
Environment:	**Browser:** Chrome		

Attachments:	Kabbalistic and Chassidic Stories – The ’Sign-up-Here’ link leads to the 'Not Secure' 'Subscriptions' page!.docx
Severity:	Major

Description

Steps to Reproduce:

1. Navigate to 'https://www.myascent.org/get-inspired/kabbalistic-and-chassidic-stories/ ' in a web browser.
2. Scroll down to the third paragraph.
3. Click on the ’Sign-up-Here’ link.

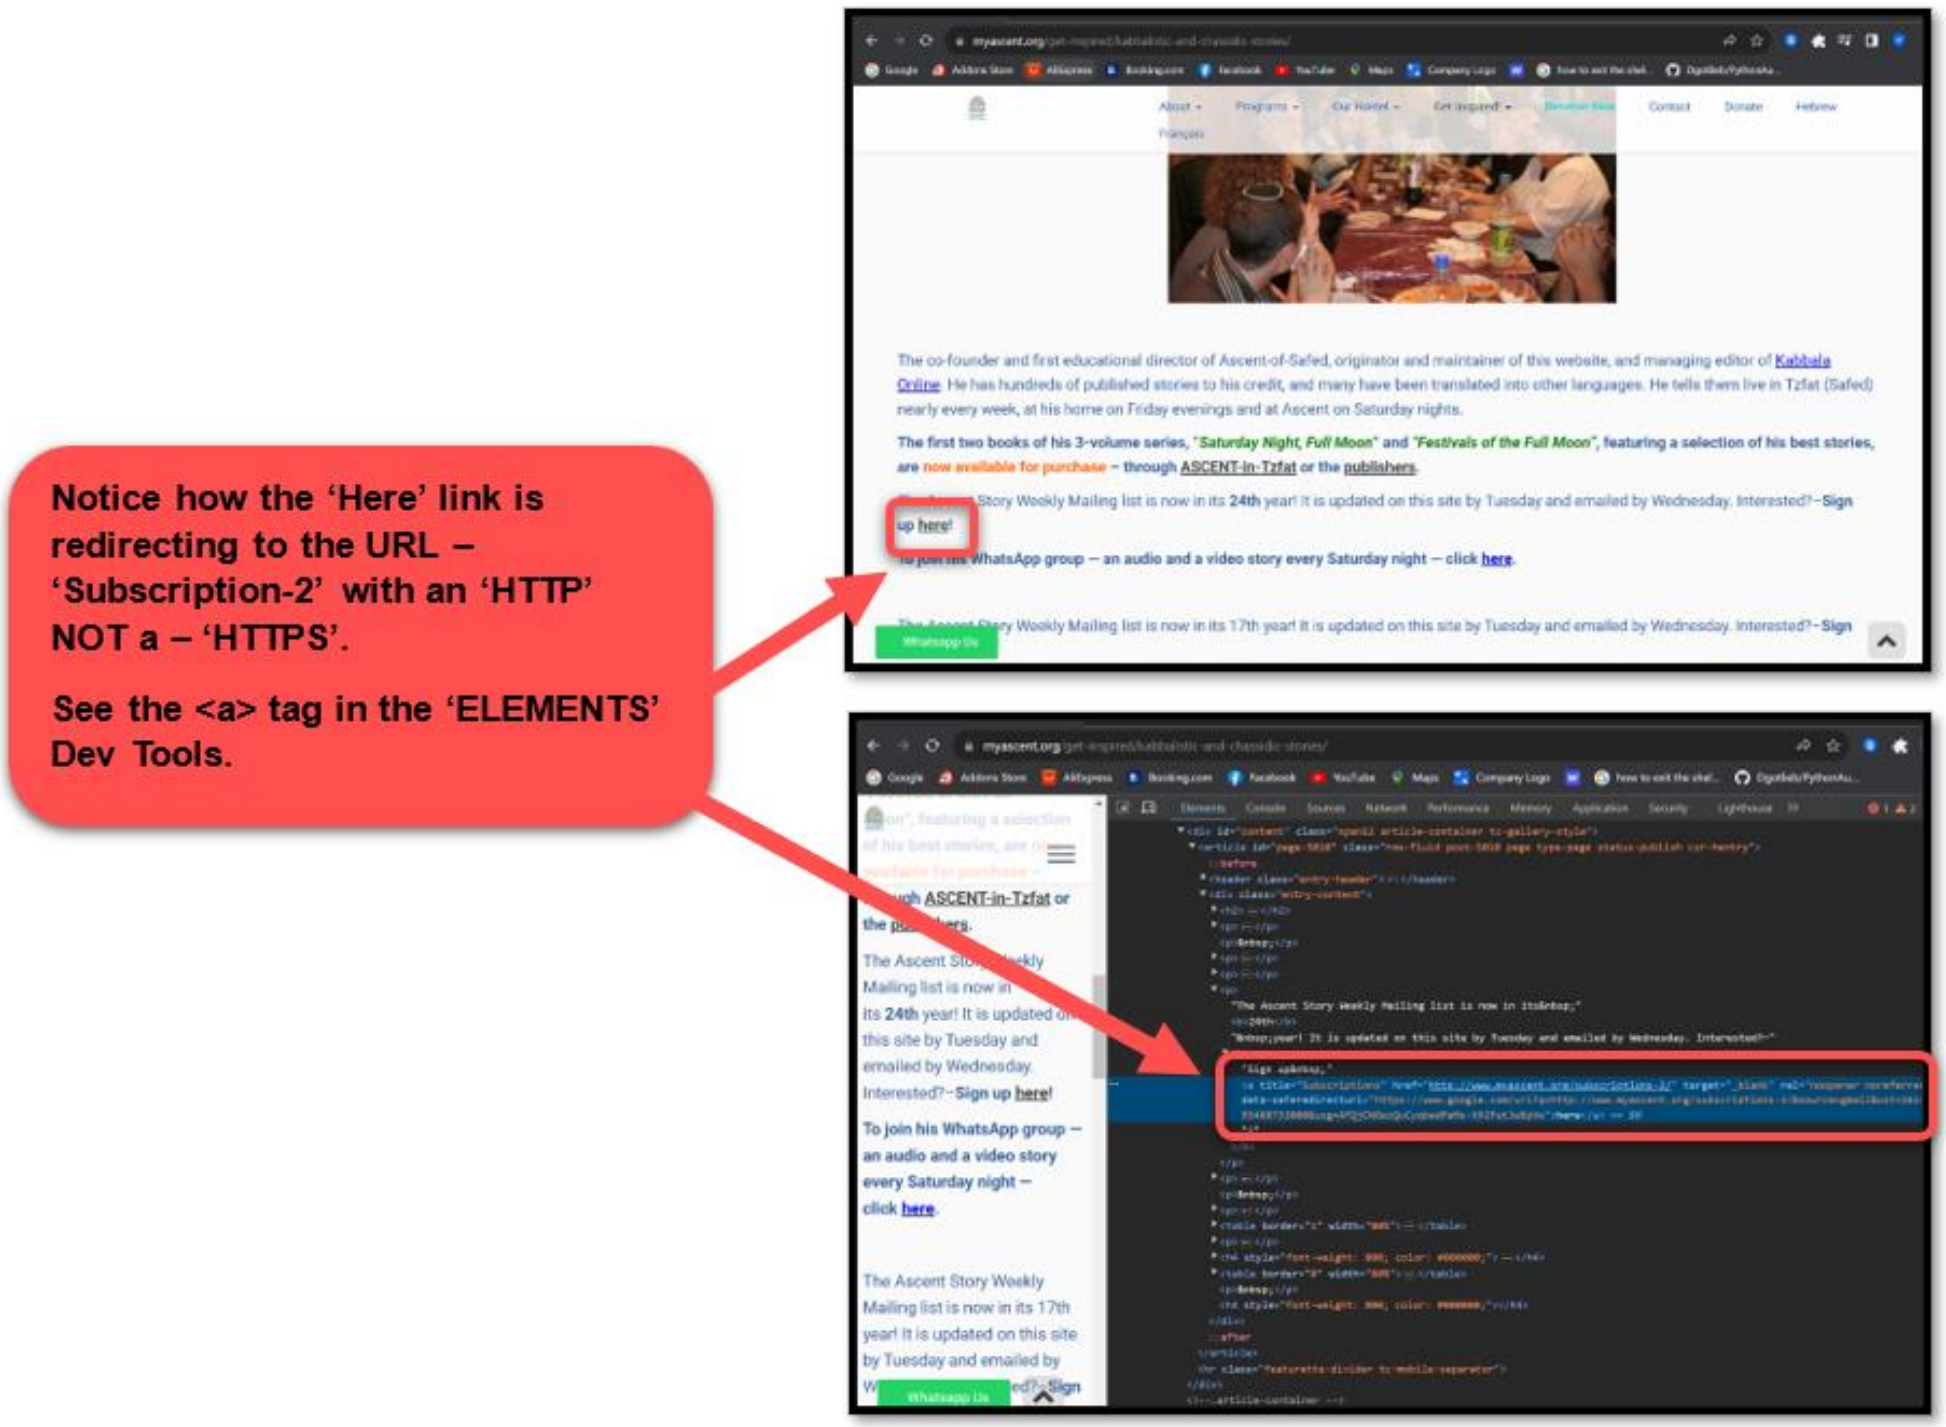
Actual Result:

1. The link leads to the URL - ‘Subscriptions-2’ page, but it’s ‘Not Secure’!
2. **When going to the URL - ‘Subscriptions-2’ from the ‘Kabbalistic and Chassidic Stories’ page it's ‘Not Secure’!**

Expected Result:

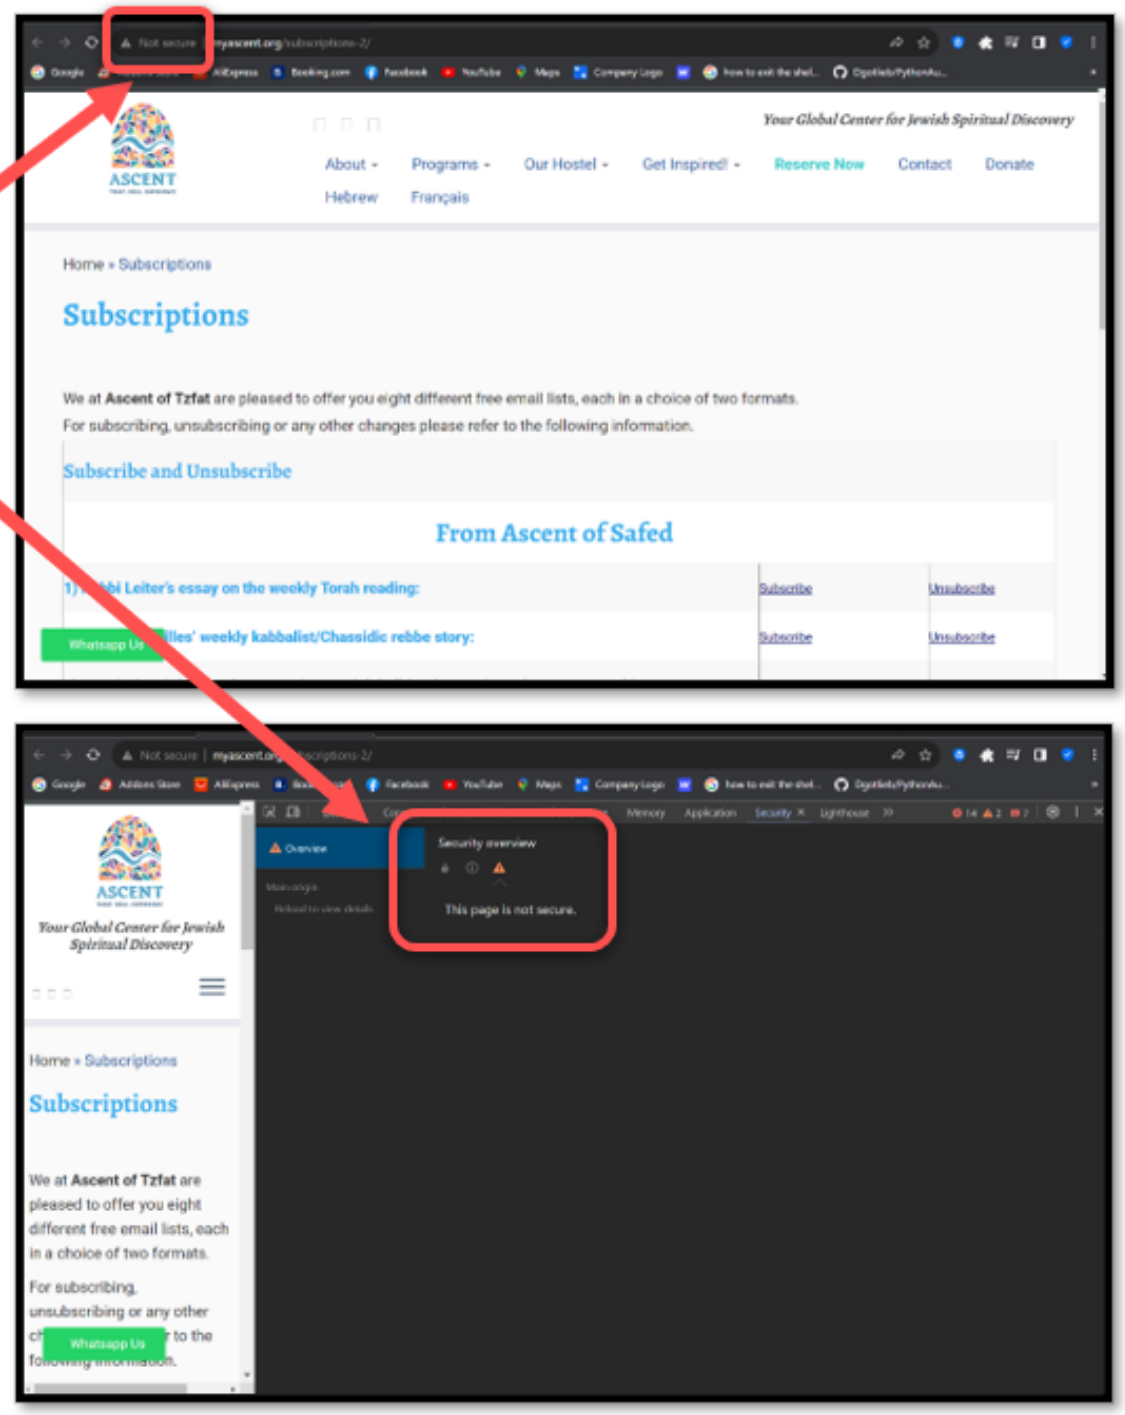
1. All links should lead to SECURE web pages.

Attachments #21:



This of course leads to a 'Not Secure' 'Subscription-2' page.

As can be seen in the 'Security' of Dev Tools.



Up

[ASC-20] Kabbalistic and Chassidic Stories - unsecure 'Publishers' link location Created: 07/Jan/24 Updated: 07/Jan/24

[ASC-19] Home page - Image Resource Not Found (404 Error) Created: 02/Jan/24 Updated: 02/Jan/24	
Status:	To Do
Project:	Ascent!
Components:	None
Affects versions:	None
Fix versions:	None

Type:	Bug	**Priority:**	Medium
Reporter:	chava	**Assignee:**	Unassigned
Resolution:	Unresolved	**Votes:**	0
Labels:	None		
Remaining Estimate:	Not Specified		
Time Spent:	Not Specified		
Original estimate:	Not Specified		
Environment:	**Browser:** Chrome		

Attachments:	Home page - Image Resource Not Found (404 Error).docx
Severity:	Major

Description

Steps to Reproduce:

1. Go to 'https://www.myascent.org/ ' on your desktop.
2. Open the browser's developer tools to the Console tab.
3. Observe the Mixed Content error for the resource 'http://www.myascent.org/wp-content/uploads/2014/08/yt-storytelling@2x.jpg'.
4. Inspect the Sources tab for the JavaScript file where the potential syntax error is highlighted.

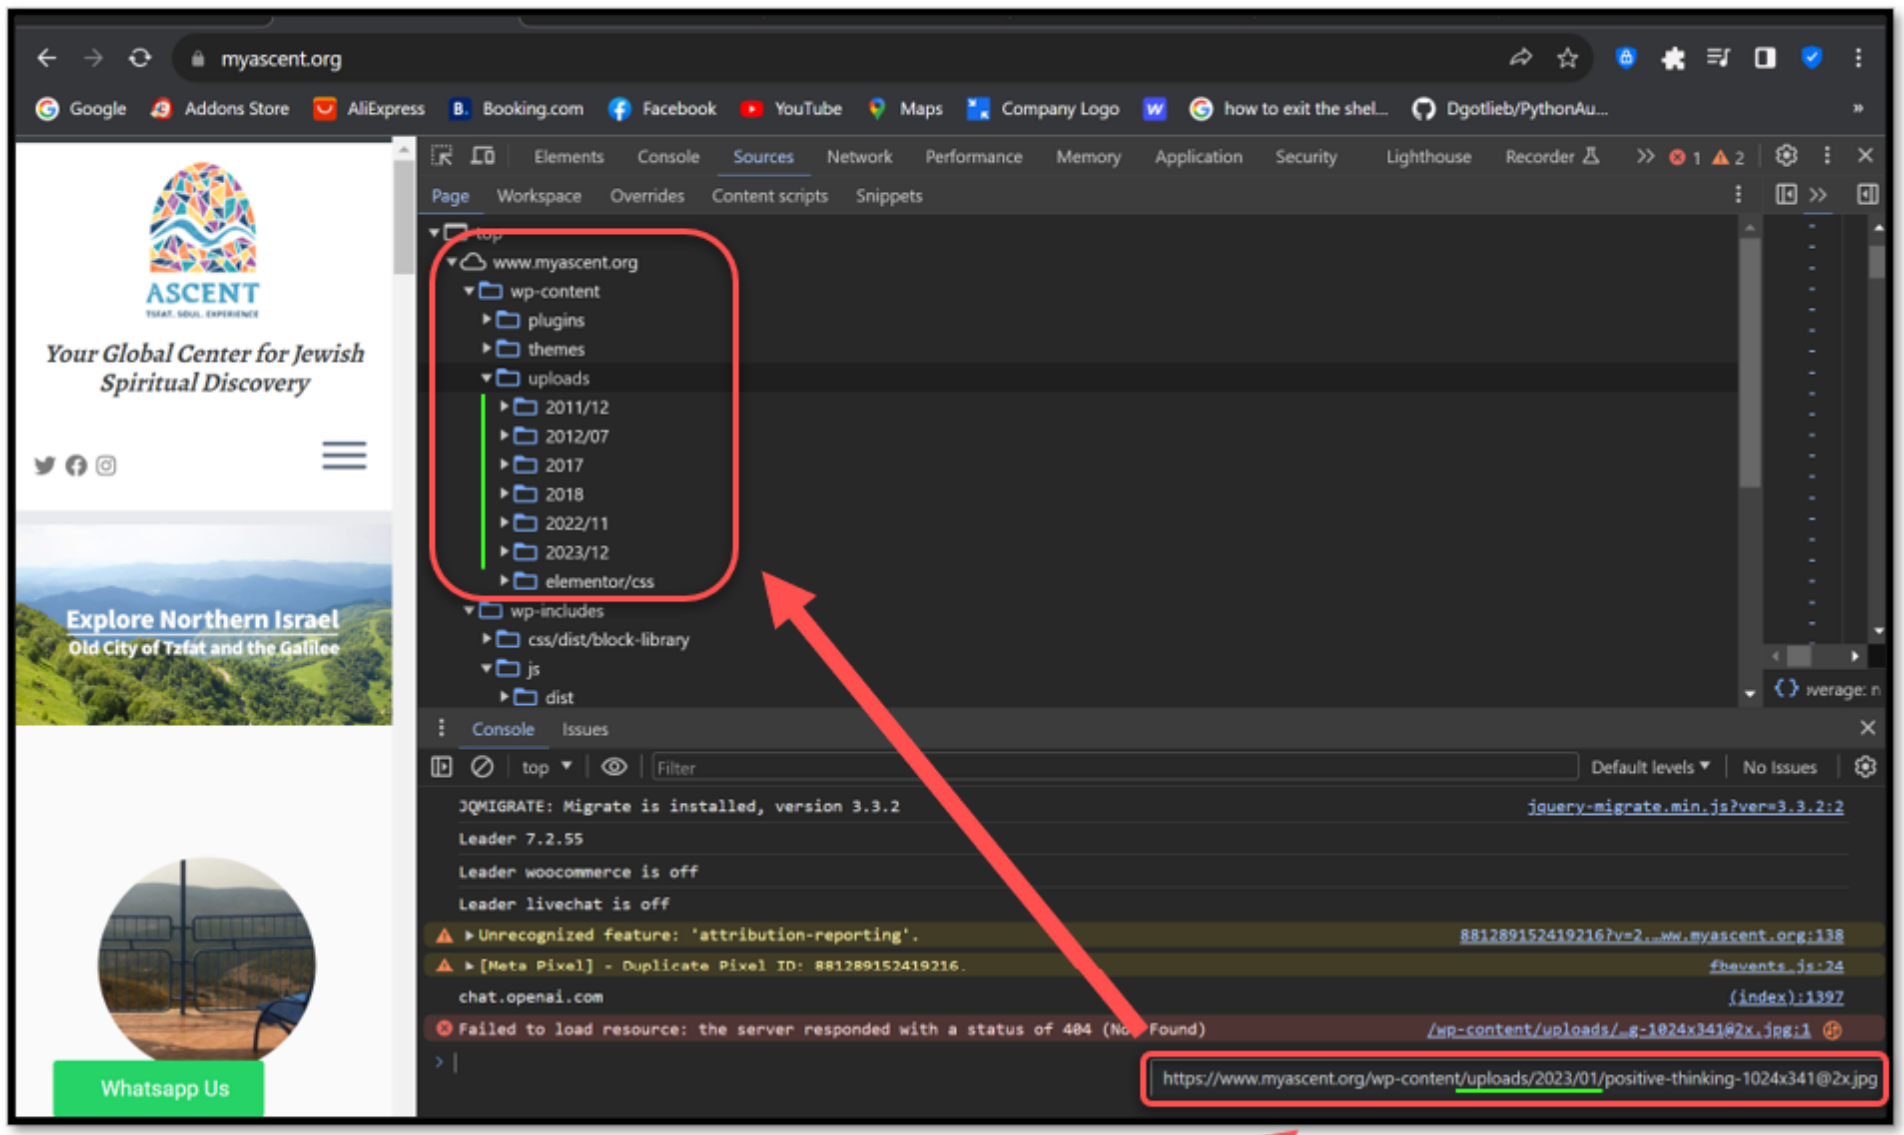
Actual Result:

1. Notice that there is no ‘2023\01’ in the directory.
2. Therefore, the image 'IMG_5048@2x.jpg' is not found, resulting in a 404 error in the browser console.

Expected Result:

1. All resources should be loaded over HTTPS to ensure content security and no browser errors should be present.

Attachments #19:



The sits directory is missing the folder that holds the image.

(2023\01)

This is resulting in a 404.

Up

[ASC-18] Kabbalistic and Chassidic Stories - unsecure 'Ascent' link location Created: 02/Jan/24 Updated: 07/Jan/24	
Status:	To Do

Attachments:	Kabbalistic and Chassidic Stories - unsecure 'ASCENT' link.docx
Severity:	Major

Description

Steps to Reproduce:

1. Navigate to 'https://www.myascent.org/get-inspired/kabbalistic-and-chassidic-stories/ ' in a web browser.
2. Scroll down to the second paragraph.
3. Click on the 'ASCENT-in-Tzfat' link.

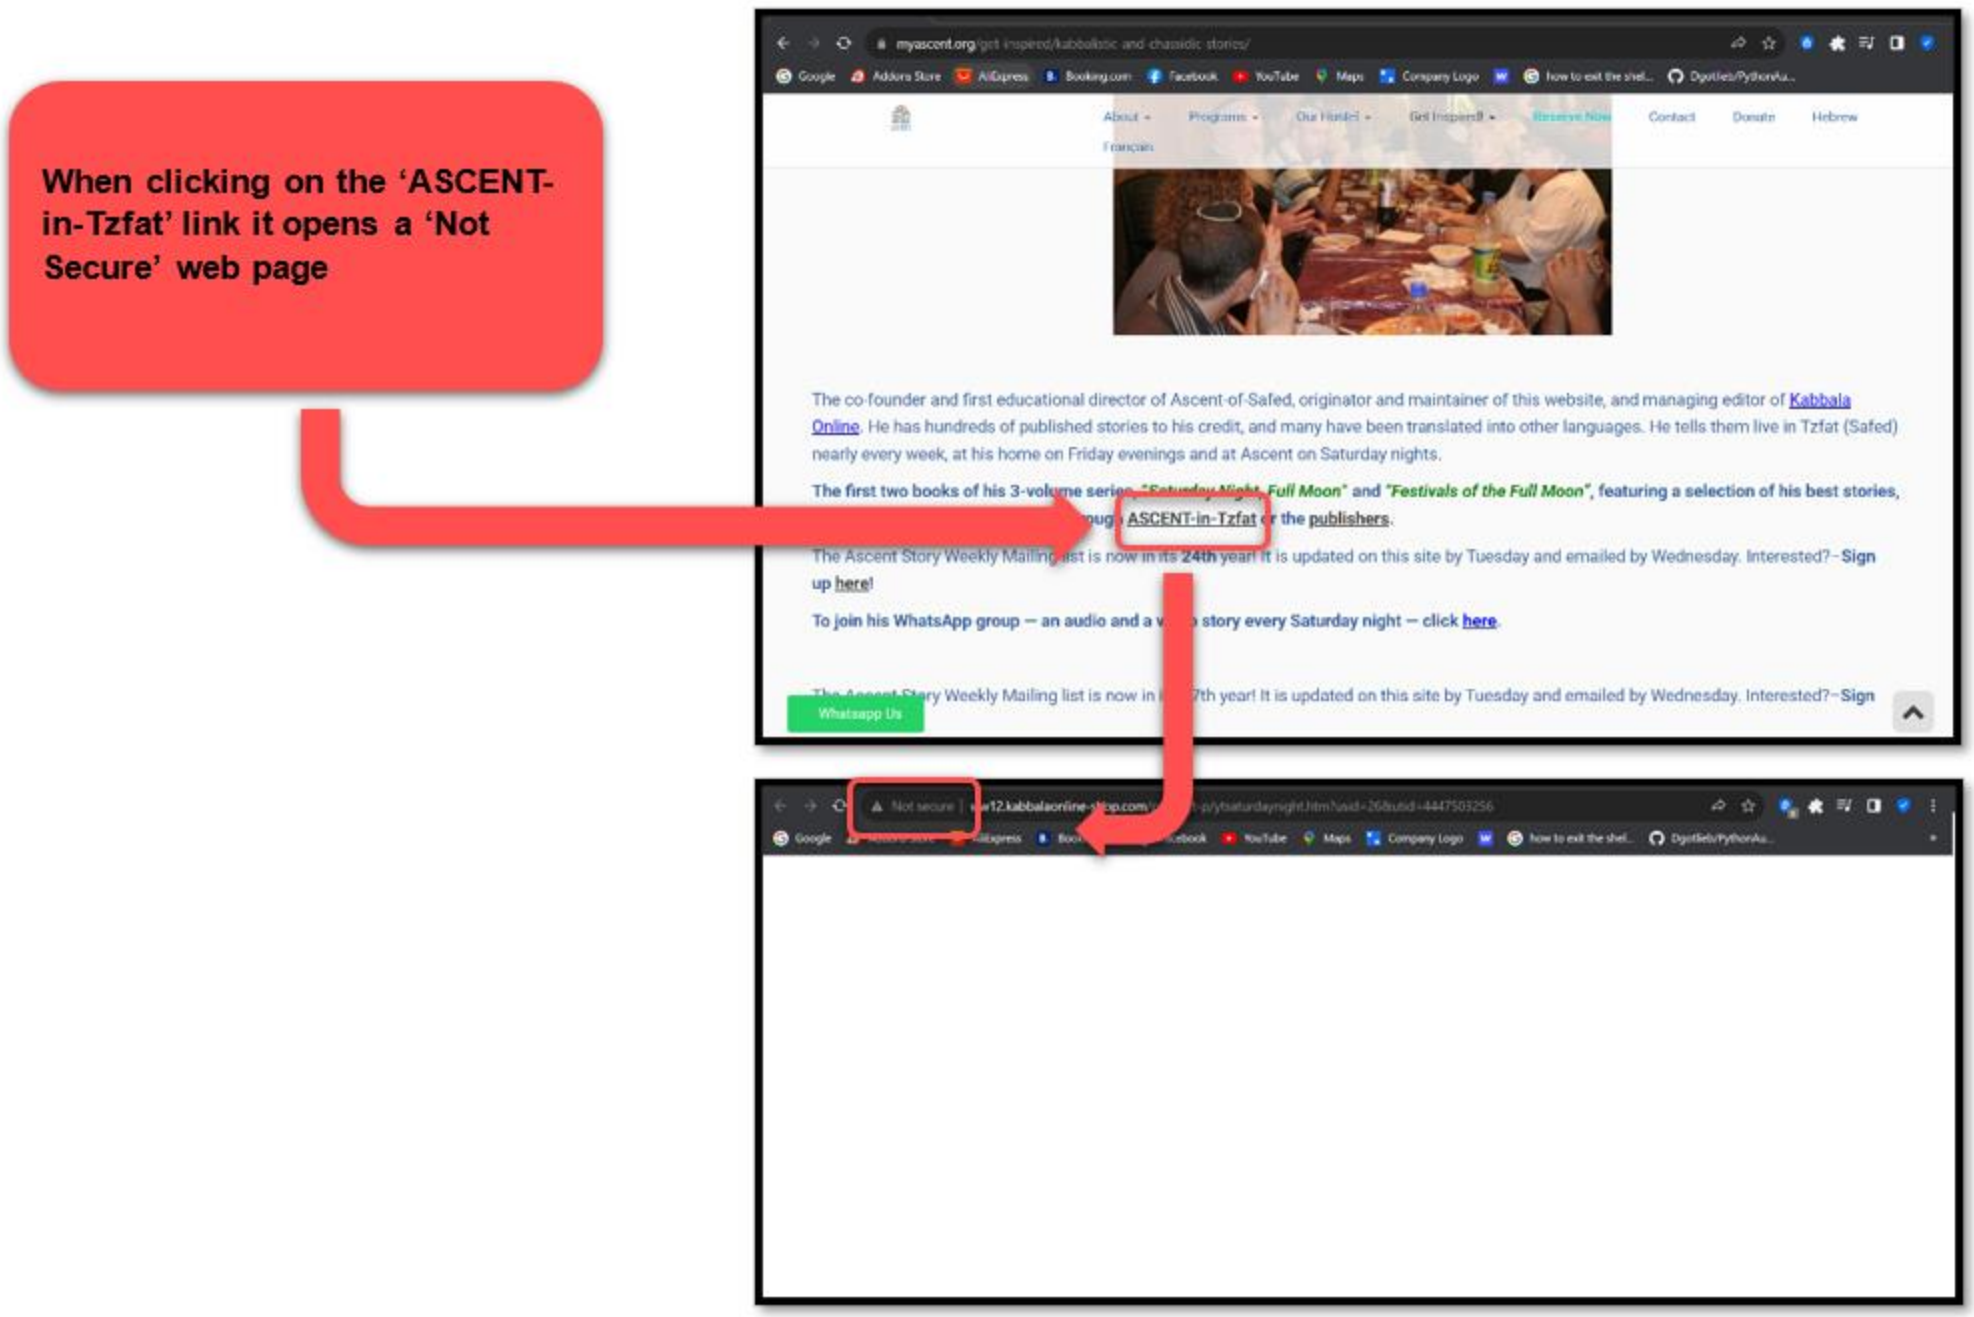
Actual Result:

1. The link leads to a 'Not Secure' web page.

Expected Result:

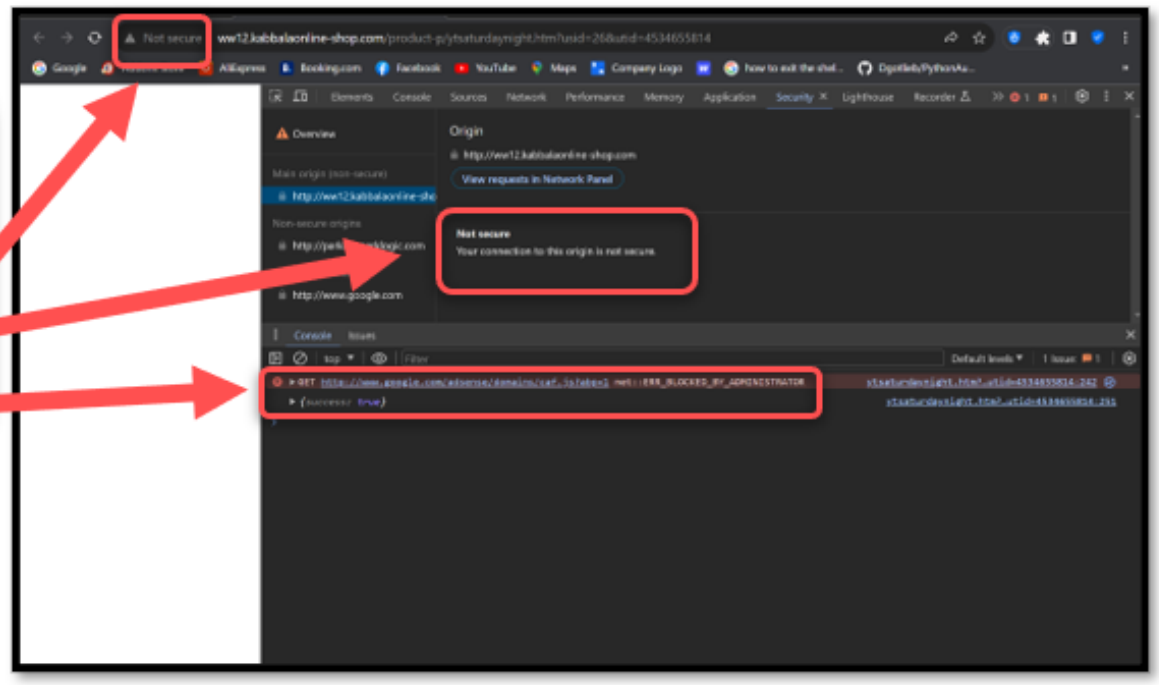
1. All links should lead to SECURE web pages.

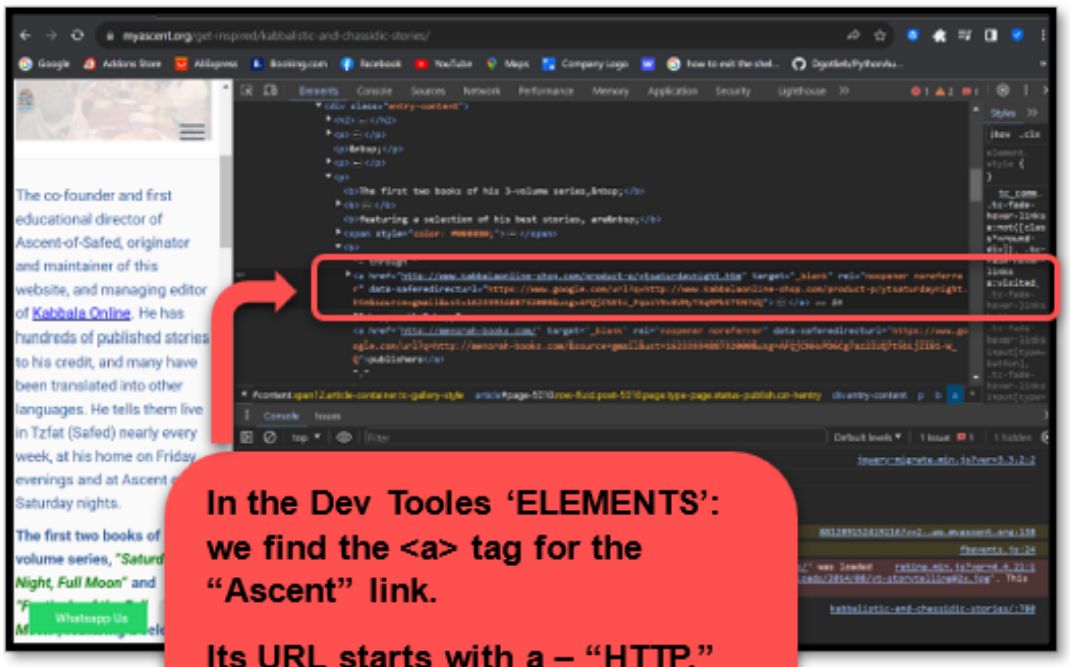
Attachments #18:



In the Dev Tooles ‘Security’: there’s a ‘Not Secure’ message.

+ In the ‘Console’ there’s a message that: “ERR_BLOCKED_BY _ADMINISTRATOR.”





In the Dev Tooles ‘ELEMENTS’: we find the <a> tag for the “Ascent” link.

Its URL starts with a – “HTTP.”

NOT – “HTTPS”

This makes the site UNSECURE!

Original estimate:	Not Specified		
Environment:	**Browser:** Chrome		

Attachments:	volunteering form - random info no validation.docx
Severity:	Minor

Description

Steps to Reproduce:

1. Navigate to 'https://www.myascent.org/events-2/volunteering/ ' in a web browser.
2. Scroll down to the 'Volunteering' form.
3. Enter Random information into:

- Area code (+213)
- address (Beit Shemesh)
- Apt, suite, etc. (5)
- country (Iraq)
- City (BX)
- State (6)
- zip code (57&6)

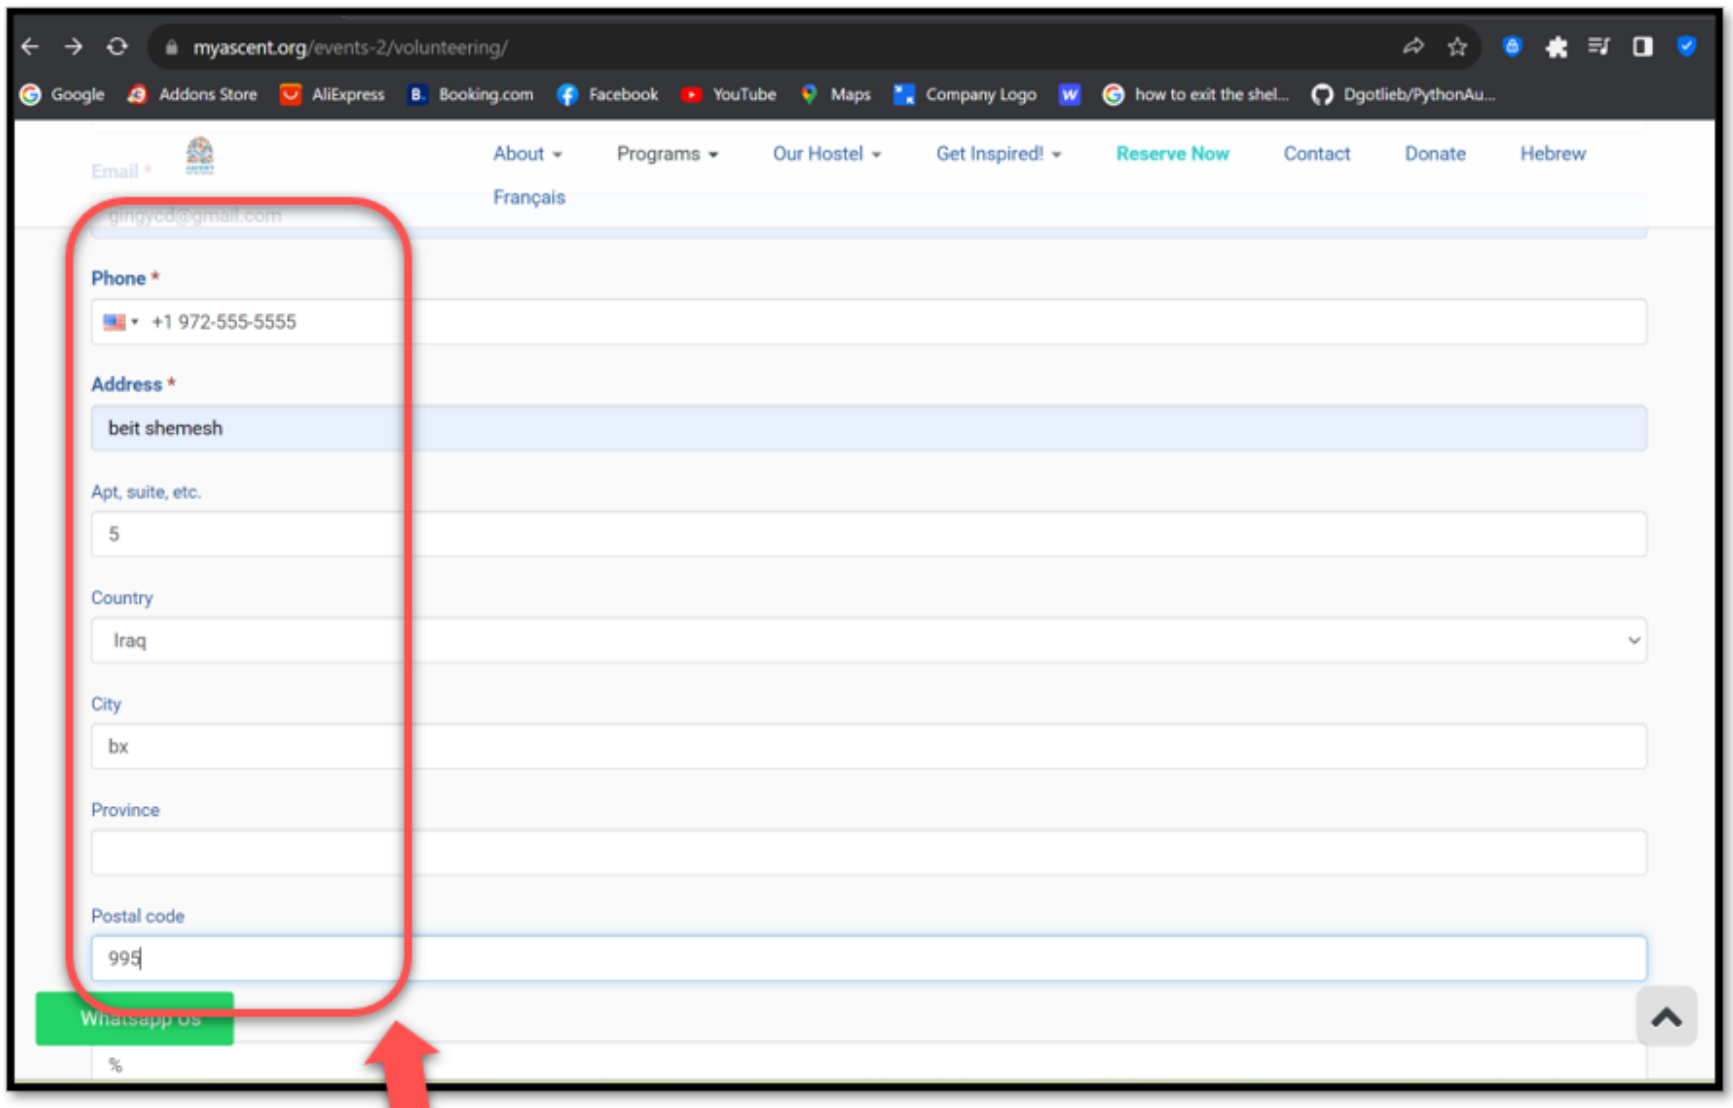
Actual Result:

1. The form doesn't confirm that the information entered is all from the same location in the world, instead, it accepts Random information bunched together and submits the form.

Expected Result:

1. There should be a validation process making sure every piece of information entered is in sync with the previous input's location.

Attachments #17:

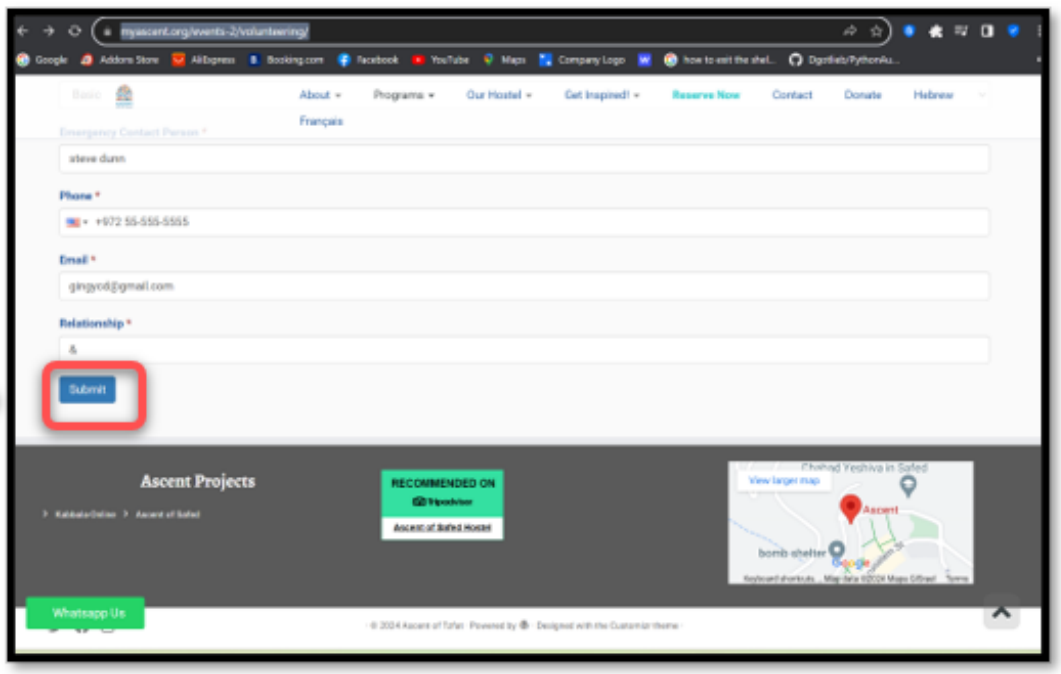


Notice That the form doesn't confirm that the information entered is all from the same location in the world.

1

The form allows you to click on ‘Submit’ with random info in the form.

2



Confirmation of successful submission of the form.
